Prescription Monitoring Program (PMP)

- Maine's Prescription Monitoring Program (PMP) is a tool created to prevent and detect prescription drug misuse and diversion, and improve patient care through better coordination of care. PMP maintains a database of all transactions for schedule II, III and IV controlled substances dispensed in the State of Maine.
- If you do not have a PMP ID or if you cannot remember your PMP ID or password, please visit the State of Maine's website at this link: <http://www.maine.gov/dhhs/samhs/osa/data/pmp/index.htm>.

Prescriber DEA Query
Multiple State Query

Maine Data Requesters' Query Site

Query Creation Tip

Make your query as general as possible and then drill down to more specific information once you have identified the person for whom you are looking. For example, you could enter the last name of the individual, the first letter of the first name, and a birth date, and then click Next. When the preliminary results are displayed on the screen, you can highlight the person that you want to query and then click Submit to submit the query for processing.

If you enter a specific birth date for an individual and the query results are blank, click the Within field just below the Date of Birth field and resubmit the query with a wider date range, for example, within two years of birth date, to create a query with broader search criteria.

Once you have submitted the query for processing, you will be redirected to the Report Queue. In the Report Queue, click the Job Sequence ID number to view the report you requested. If the Job Sequence ID is not a hyperlink, click your browser's refresh button. The Job Sequence ID will appear as a hyperlink when the report is ready for viewing.
