### Consent Decree Performance and Quality Improvement Standards: October 2011

The attached compliance and performance standards are primarily for use in monitoring, evaluation and quality assurance of the areas covered by the Consent Decree pertaining to the community mental health system. The standards are intended to offer the parties and the court master a means of measuring system function and improvement over time and the Department's work towards compliance. If the percentage is within .5% of standard, the standard is considered met.

All standards utilizing RDS/enrollment data, inclusive of unmet need data, are reported one quarter behind (for example, reporting 3<sup>rd</sup> quarter data in the 4<sup>th</sup> quarter).

Reporting includes, where pertinent, discussion of the data and recommendations.

# **Definitions:**

Standard Title: What the standard is intending to measure. Measure Method: How the standard is being measured.

Current Level: The most recent data available for the Standard.

Performance Standard: Standard set as a component of the Department's approved Adult Mental Health

Services Plan dated October 13, 2006.

Compliance Standard: Standard set as a component of the Department's approved standards for defining

substantial compliance approved October 29, 2007.

If results fall below the performance standard level, the Department:

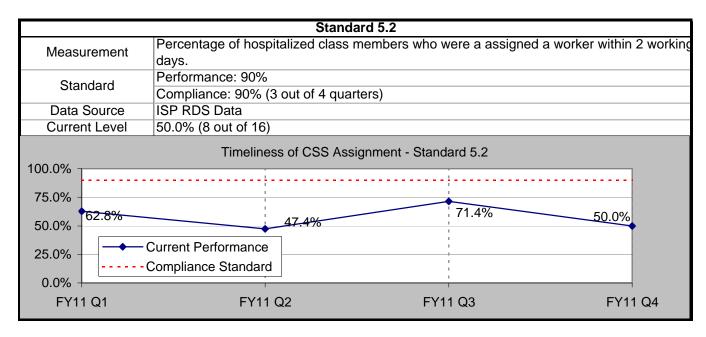

- •Consults with the Consumer Council of Maine (CCSM)
- •Takes corrective action if deemed necessary by the CCSM and
- •Develops that corrective action in collaboration with the CCSM

### Discussion:

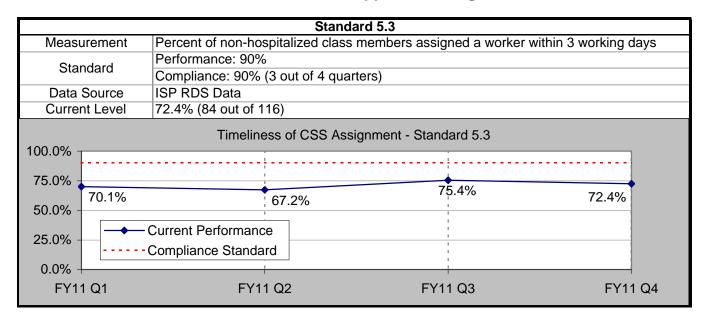

Percentage has increased from 87.9% to 89.4% over the past 4 calendar years.

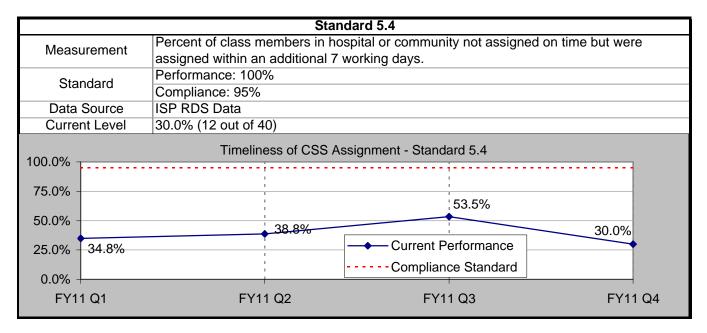

Standard 5 - Prompt Assignment of CI/ACT Workers, ISP Timeframes/Attendees at ISP Meetings

# Community Integration / Community Support Services / Individualized Support Planning

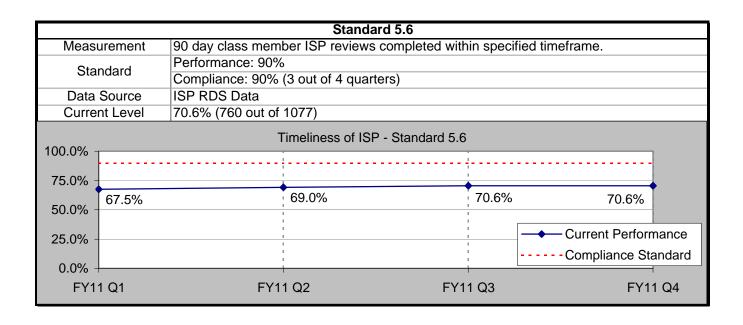

### **Discussion:**

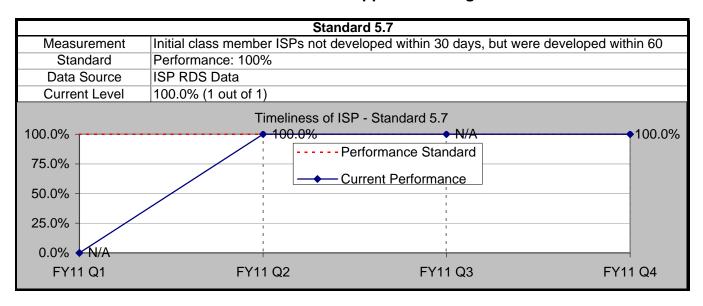

Standard 5.1: This standard is figured on RDS/enrollment data submitted for persons in service. Consequently, the standard is always met as, by definition the individual has a community integration worker. Please see the cover documentation for the unmet resource need report for information as to waitlists.

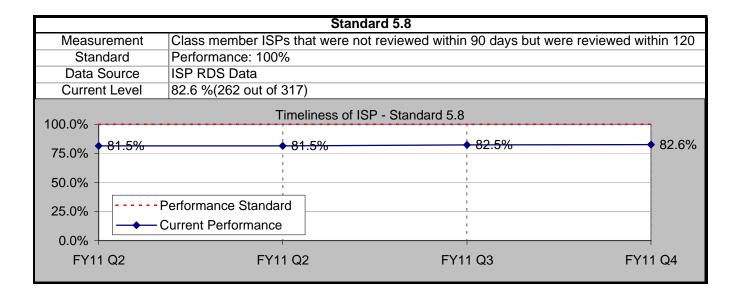

Standard 5.2, 5.3, 5.4: Timeliness standards continue not to be met. Over the past quarter, the field service teams have reviewed waiting lists with CI agencies on a weekly basis. These steps have been undertaken to work with providers to improve their performance in meeting these standards.

# Community Integration / Community Support Services / Individualized Support Planning

Standard 7 - ISPs are based on class members' strengths & needs

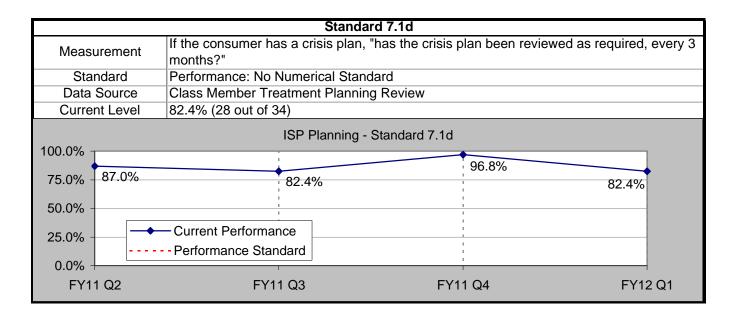

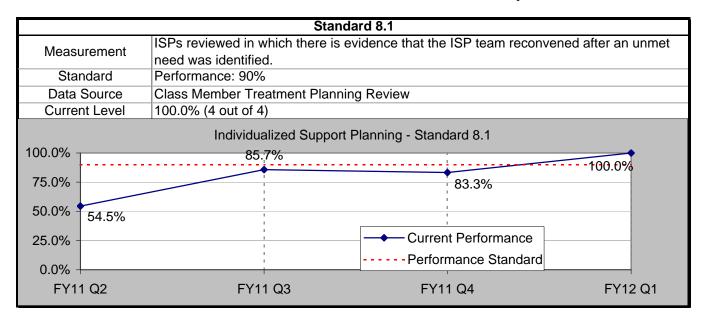

### **Discussion:**

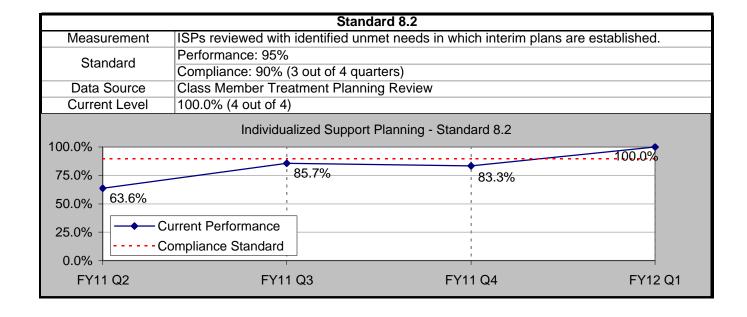

Standard 7.1a: Met continuously since the first quarter of FY 08.

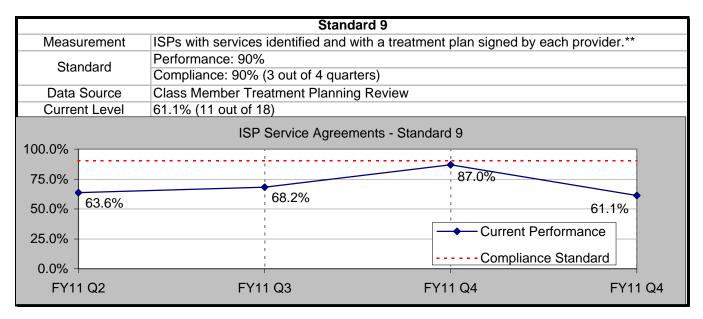

Standard 8 - Services based on needs of class member rather than only available services

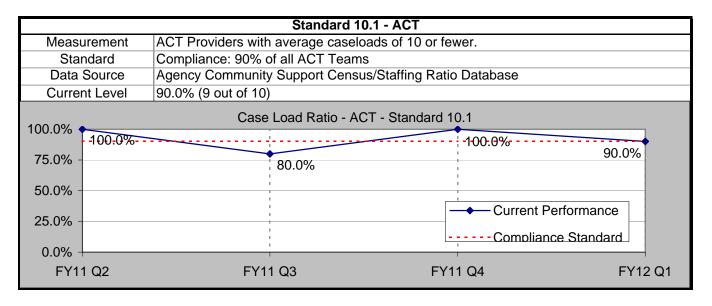

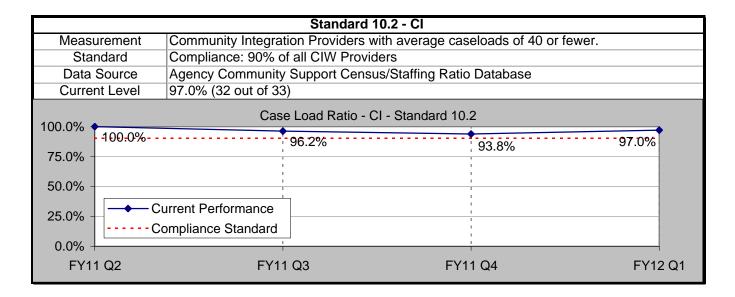

Standard 9 - Services to be delivered by an agency funded or licensed by the state

# Community Integration / Community Support Services / Individualized Support Planning

Standard 10 - Case Load Ratio

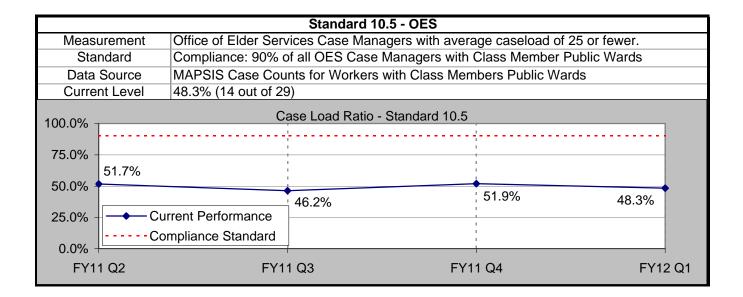

### **Discussion:**

Standard 10.1: The 10/01/2009 revision of MaineCare Section 17 clearly specified staff to be included in calculating staffing ratios; ratio has been met since the 2nd quarter FY 10, except Q3 FY 11

Standard 10.2: Community Integration caseload ratios have been met since the 2nd quarter FY 08

	homeless. ICMs no longer carry traditional caseloads. In the future, if ICMs carry		
	caseloads, OAMHS will resume reporting caseload rartios.		

# **Discussion:**

Standard 10.5: OES continues not to meet staff/client ratios. OES received 1 new case worker position in the FY 11 legislative session - position was then eliminated for budgetary considerations.

### **Recommendations:**

Continue to monitor

- 4 patients discharged greater than 45 days post clinical readiness for discharge

# Community Resources and Treatment Services Housing and Residential

Standard 15 - Housing where community services are located / Homes with more than 8 beds

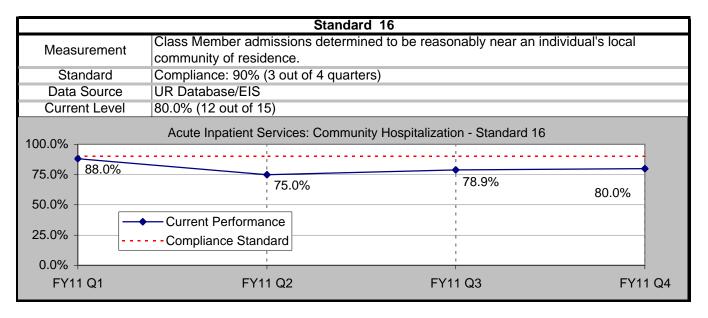

## **Discussion:**

Standard met since 2007.

The protocol for obtaining the informed consent of Class Members to live in homes with greater than 8 beds (Settlement Agreement Paragraph 96) is followed annually to track data for this standard. OAMHS is currently preparing an amendment request to modify this requirement.

# Community Resources and Treatment Services Acute Inpatient Services: Involuntary Community Hospitalization

Standard 16 - Psychiatric Hospitalization reasonably near an individual's local community

Reasonably Near is defined by Attachment C to the October 29, 2007 approved Compliance Standards.

## **Discussion:**

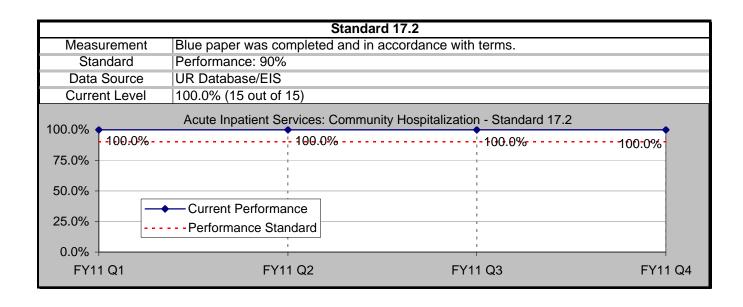

Standard not met since Q4 FY 10. The number of class member reviews is small making it difficult to draw conclusions systemically.

#### **Recommendations:**

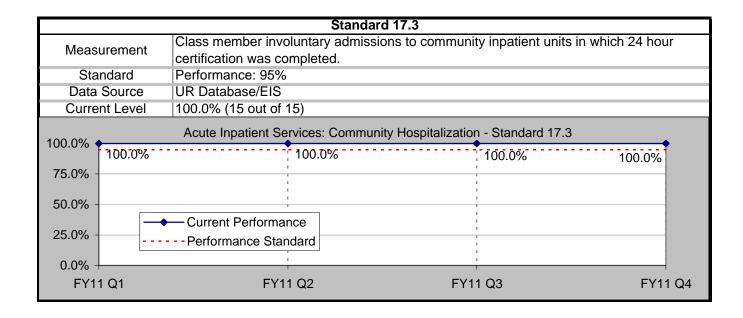

Continue to monitor.

# Community Resources and Treatment Services Acute Inpatient Services: Involuntary Community Hospitalization

## **Discussion**

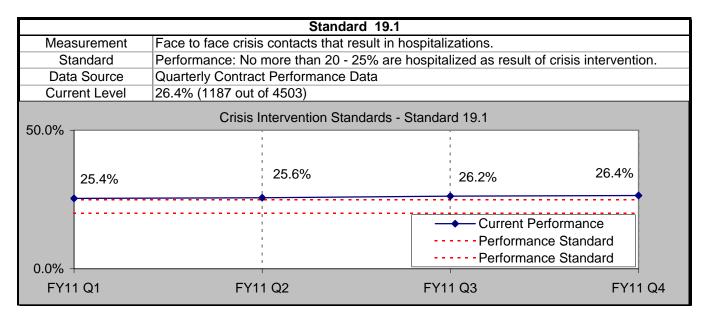

Standards 18.1, 18.2, and 18.3: Each quarter, hospital specific data regarding these standards is posted online and CSNs notified of their availability. Numbers for each standard are very small making it difficult to draw definitive conclusions. Worker participation has been higher than the hospital actually receiving the ISP.

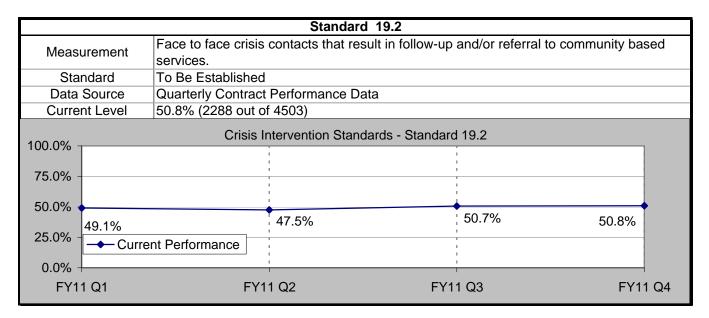

## **Recommendations:**

Continue to monitor and post data on the OAMHS website

# System Outcomes: Supporting the Recovery of Adults with Mental Illness Recovery

Standard 32 - Functional improvements in the lives of class members receiving services

# System Outcomes: Supporting the Recovery of Adults with Mental Illness Recovery

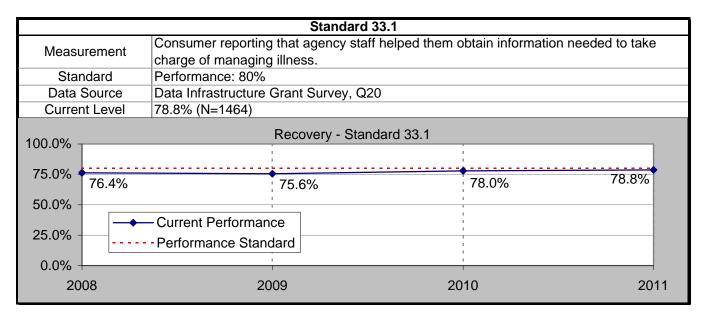

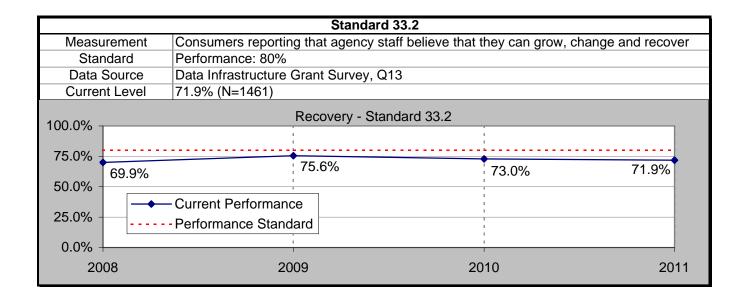

### **Discussion:**

The result of the 2008 DIG Survey pertaining to functional outcomes can not be compared to the results obtained in 2007, and earlier, due to the language change in the header between the two administrations. In 2007, the header read: "As a direct result of your services...". In 2008, the header read: "In order to provide the best possible mental health services, we would like to know the effectiveness of your mental health services during the past 30 days". This change was made in order to move towards using the DIG survey to measure individual outcomes over time by narrowing the timeframe on the information collected. The change in headers resulted in a dramatic change in percentage of individuals reporting positively on functional outcomes.
