

Reporting Section	Data Point	Definition
Required State Reporting	Childcare Health Consultant	Child Care Health Consultants (CCHCs) are health professionals (a physician, physician's assistant, nurse practitioner, or registered nurse with pediatric or child care experience) who work to support early learning teams to improve the health and safety of children within their care (such as licensed child care facilities or licensed afterschool child care programs).
Required State Reporting	Collaborative Practice Agreement	Is a written and signed agreement between a physician licensed in this State or a school health advisor under section 6402-A and a school nurse under section 6403-A that provides for the prescription of specific medications as allowed by law and administration of such medication by a school nurse or designated school personnel to students during school or a school-sponsored activity under emergency circumstances specific to the medication. (epinephrine or opioid antagonist)
Optional Health Data	Concussion	The total number of individual students who received a diagnosis of concussion during the specified reporting period, based on documentation from a qualified health care provider or other authorized clinical source.
Optional Health Data	Diagnosis	Documented diagnosis by a licensed healthcare provider of a specific disease
Optional Health Data	Emergency Action Plan	A child-specific guide/plan for school staff to facilitate quick and appropriate response for an individual student health emergency (ANA & NASN, 2022).
Required State Reporting	Hearing Referral Outcomes	Referral completed indicating normal ear function; Referral completed and permanent hearing loss identified; Referral completed and temporary hearing loss or other temporary problem identified; Referral outcome unknown, lost to follow up.
Required State Reporting	Hearing Screening	A consistent, evidence-based process of identifying students with potential hearing or ear disorder as required in Maine rule 05-071 C.M.R. Ch. (2018).
Optional Health Data	Individualized Health Care Plan	A plan of care written by a registered nurse that translates the student's healthcare for the educational setting. It is created in collaboration with student, parent, and healthcare provider (ANA & NASN, 2022).
Required State Reporting	Medication Error	A medication error is any act or omission during the path from prescription to the actual administration of the medication. Any missed dose or mistake in the person, medication, dose, time, route, or documentation is an error.
Required State Reporting	Referral	A consistent process of directing the student through their parent or guardian for a higher level of evaluation due to the results of the screening process.
Health Program Information	School Based Health Center	School Based Health Center means a clinical site located within a school building, which provides routine medical services and behavioral health services to the student body of a school.

Required State Reporting	Student with As-Needed Prescribed Medication	A student who has a current health-care provider prescription for medication that is intended to be administered or made available on an as-needed (PRN) basis during the school day or at school-sponsored activities, according to the prescribed medication order.
Required State Reporting	Student with Scheduled Prescribed Medication	A student who has a current health-care provider prescription for medication that is intended to be administered on a scheduled basis during the school day or at school-sponsored activities, according to the prescribed medication order.
Required State Reporting	Universal Behavioral Health Screening	A consistent process of valid, reliable, and age- appropriate screening for behavioral, or social/emotional needs that is administered to all students or a specific grouping of students.
Required State Reporting	Vision Referral Outcomes	Referral completed indicating normal eye function; Referral completed and treatment was recommended (prescription glasses, eye patching, etc.); Referral outcome unknown, lost to follow up.
Required State Reporting	Vision Screening	A consistent, evidence-based process of identifying students with potential vision or eye health disorder as required in Maine rule 05-071 C.M.R. Ch. (2018).
