LITTLE SABATTUS POND

(Hooper Pond)

Greene Twp., Androscoggin Co.
U.S.G.S. Lake Auburn East, Me. (7.5')

Fishes

Largemouth bass
Yellow perch
Northern pike
Chain pickerel
Minnnows
Golden shiner

White sucker
Hornpout (bullhead)
Pumpkinseed sunfish
American eel

Physical Characteristics

Area - 25 acres

Maximum depth - 14 feet

Temperatures:

Surface - 80°F

14 feet - 62°F

Principal fisheries: Largemouth bass, chain pickerel and northern pike

Little Sabattus Pond is a shallow, weedy productive pond, which is very well suited for warmwater fisheries management. Northern pike, which most likely traveled up the outlet from Sabattus Pond, have only been present for a few years. Currently, bass and pickerel are providing a very good fishery, and undoubtedly northern pike will become more of an attraction at this small pond in the future.

A town owned access site, located along the Hooper Pond Road, provides adequate access for small boats and canoes.

Surveyed - September 1961
