

**SUTHERLAND POND**  
Webster Twp., Androscoggin County  
U.S.G.S. Lewiston, Maine

Fishes

Yellow perch	White sucker
Chain pickerel	Hornpout (bullhead)
Minnnows	Pumpkinseed sunfish
Golden shiner	American eel

Physical Characteristics

Area - 53 acres	Temperatures
	Surface - 82°F
Maximum depth - 9 feet	5 feet - 78°F

Principal fishery: Chain pickerel

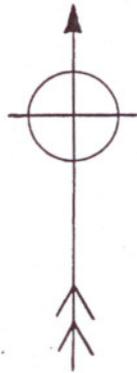

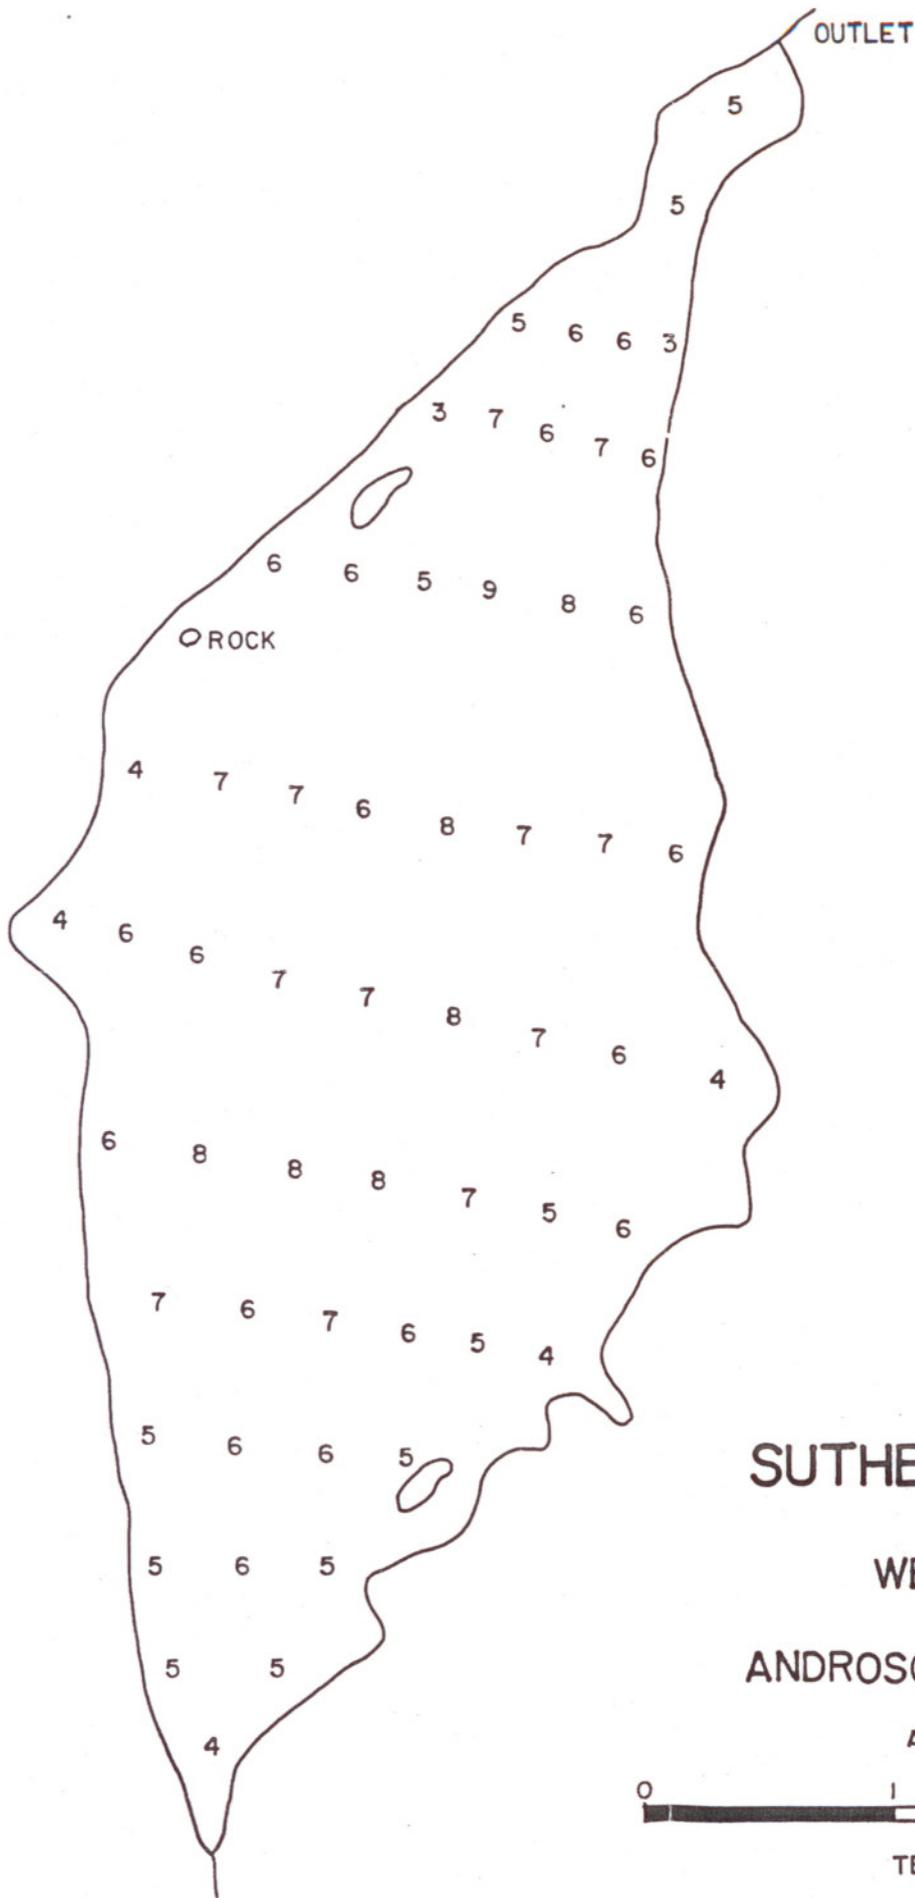

Sutherland Pond is a shallow pond that provides good habitat for warmwater gamefishes. During the summer months, aquatic vegetation grows profusely throughout the pond, and water temperatures climb into the eighties.

A thriving pickerel population is present in Sutherland Pond. Excellent fishing for this species is available to both ice and open water anglers. October fishing for warmwater fishes is permitted here.

Sutherland Pond should continue to be managed as a pickerel pond. The introduction or stocking of other species is not recommended.

Surveyed - August, 1959  
(Revised, 1989)

Maine Department of Inland Fisheries and Wildlife
