

MINK POND
T14R10, Aroostook Co.
U.S.G.S. Allagash Falls, Me.

Fishes

Minnows
Redbelly Dace

Physical Characteristics

Area — 21 Acres

Temperatures

Surface — 72° F.

2 feet — 72° F.

Maximum Depth — 2 feet

Principal fishery: None

Mink Pond is very shallow and has a silt-covered bottom. Summer water temperatures are too warm to support brook trout. Furthermore, neither the inlet or the outlet is suitable as brook trout habitat.

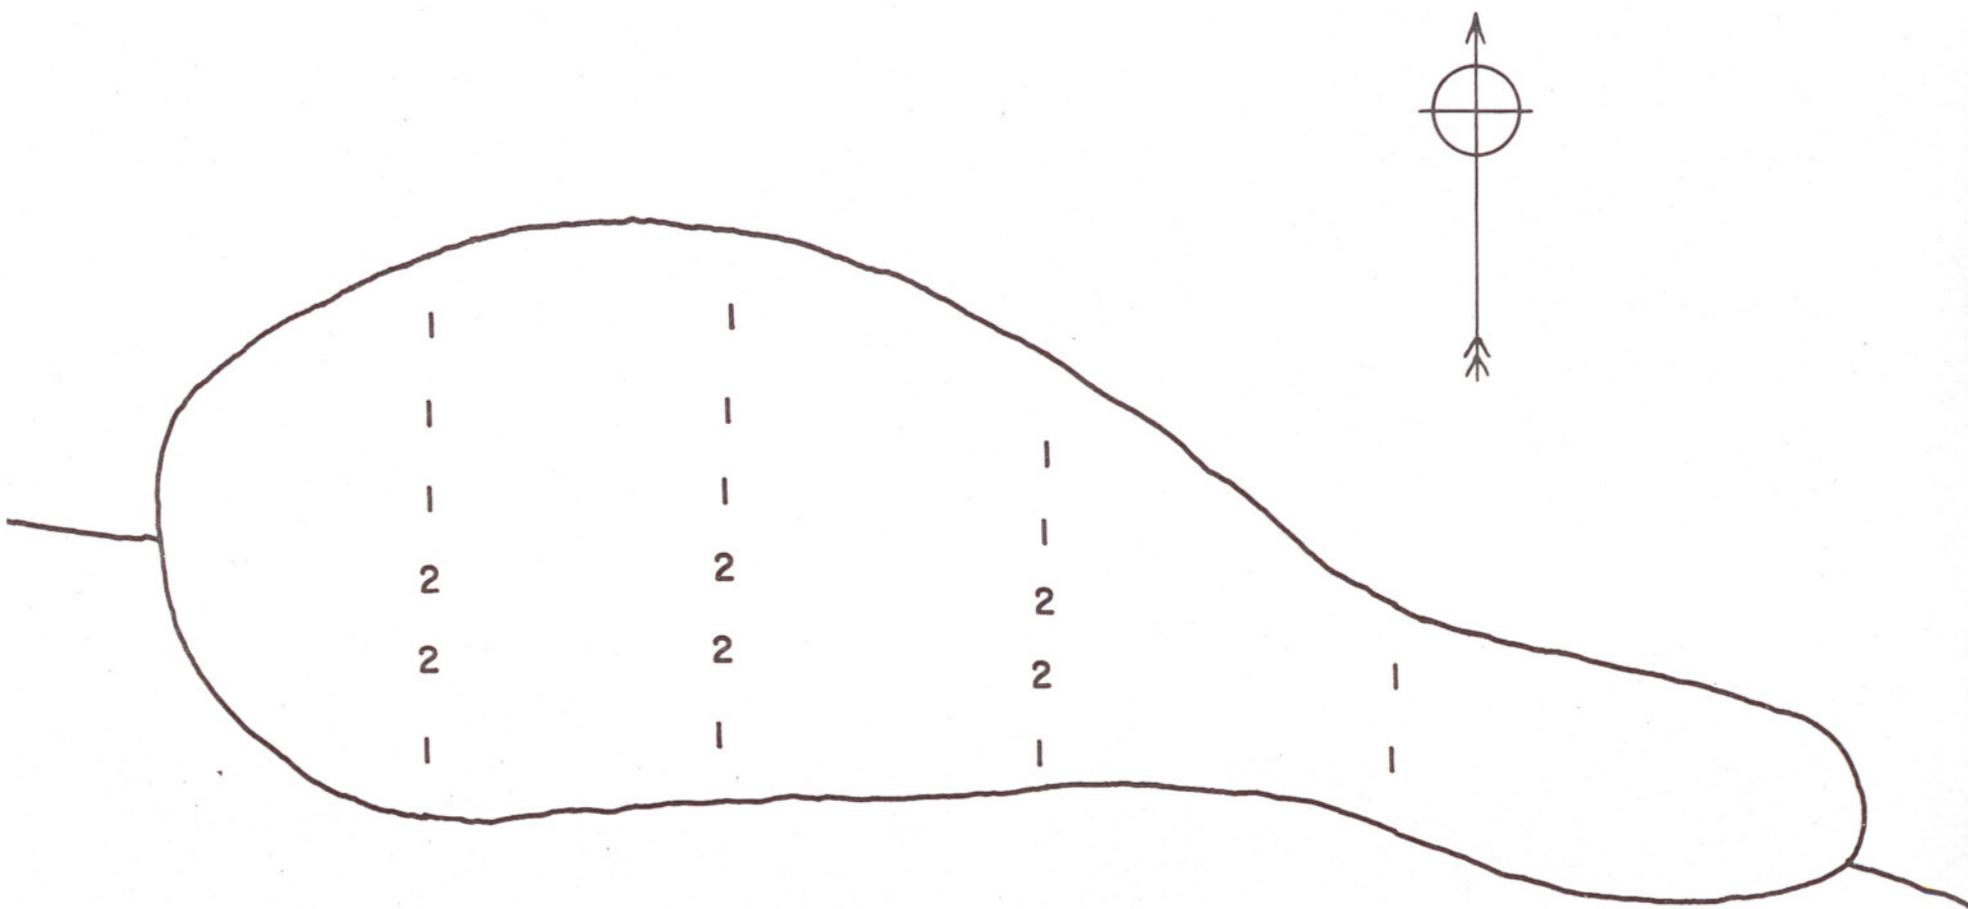

The pond is located about 200 yards from the nearest woods road, which parallels the outlet.

Surveyed — August, 1976

Maine Department of Inland Fisheries and Wildlife

Published under Appropriation No. 4550.

A Contribution from Dingell-Johnson Federal Aid Project F-28-P,
