

MIDAS # 5442
SAVADE POND

WINDSOR TWP, KENNEBEC CO., MAINE

AREA 42 ACRES

SAVADE POND

Windsor Twp., Kennebec County
U.S.G.S. Weeks Mills, Maine

Fishes

Brown trout	White sucker
Rainbow smelt	Hornpout (bullhead)
White perch	Pumpkinseed sunfish
Yellow perch	American eel
Chain pickerel	Sea-run alewife
Minnnows	
Golden shiner	

Physical Characteristics

Area - 59 acres

Maximum depth - 52 feet

Temperatures:
Surface - 72⁰F
50 feet - 43⁰F

Principal fisheries: Brown trout, white perch, chain pickerel

Water quality of Savade Pond is considered marginal for coldwater fishery management. Brown trout management has been successful in other central Maine waters with similar water quality, therefore stocking of browns was initiated in 1975. Brown trout are currently stocked annually which maintains an acceptable fishery.

Surveyed - August, 1954

Revised - 1997
