

SEVEN TREE POND

Union and Warren Twp., Knox Co.
U.S.G.S. Union, Me. (7.5')

Fishes

Brown Trout	Golden shiner
Rainbow smelt	White sucker
Smallmouth bass	Hornpout (bullhead)
Largemouth bass	Banded killifish
White perch	Redbreast sunfish
Yellow perch	Pumpkinseed sunfish
Chain pickerel	American eel
Minnows	Sea run alewife

Physical Characteristics

Area - 523 acres

Temperatures:

Maximum depth - 45 feet

Surface - 78°F

45 feet - 50°F

Principal fisheries: Brown trout, Smallmouth bass, Largemouth bass, White perch, Chain pickerel

Seven Tree Pond provides good fishing for warmwater species including bass, white perch, and pickerel. In 1966, Department personnel successfully stocked Seven Tree Pond with largemouth bass. Largemouth bass now provide an attractive supplement to the fine smallmouth bass fishery.

Attempting to create a coldwater fishery, and because Seven Tree Pond has only marginal water quality, brown trout were stocked experimentally in 1972. Annual stockings are necessary to maintain a fishery due to the lack of spawning habitat. Even though a few browns 'hold-over' to old age the poor returns to the angler resulted in the suspension of the program.

Future brown trout stockings are planned but the numbers will be reduced.

A paved State owned boat launch facility is located off State Route 235 in the town of Union.
