Bill Morris Pond is located northwest of Heald Mountain. It has no major inlets and its outlet flows southwest into Spencer Lake. The pond's rocky shoreline is undeveloped.

Water quality in Bill Morris Pond is good for coldwater gamefish, with cool, well-oxygenated water below 10 feet. The pond lacks suitable spawning and nursery habitat for brook trout, so it is stocked annually to maintain a fishery.

Bill Morris Pond is accessible via a series of gravel logging roads reached from Route 201 in West Forks Township. The pond is closed to fishing in the winter months.
