

Midas #4898
COLBY POND

LIBERTY TWP., WALDO CO., MAINE
 27 ACRES

COLBY POND

Liberty Twp., Waldo Co.
U.S.G.S. Razorville, Maine

Fishes

Yellow perch
Chain pickerel
White sucker

Hornpout (bullhead)
American eel

Physical Characteristics

Area - 26 acres

Maximum depth - 12 feet

Principal fishery: Chain pickerel

Temperatures:

Surface - 75⁰F

10 feet - 65⁰F

When Colby Pond was originally surveyed it was much larger and deeper, but since the failure of the old rock dam this pond has become more of a bog. Bog-type plants ring the shoreline and are very numerous. In 1981, biologists visited the pond to update water quality information and found it difficult to reach the water. At that time maximum depth was only 3 feet. Colby Pond is now only a 'wide spot' in the stream.

Surveyed - July, 1966

Revised - 1998
