

BEAVER DAM POND  
Berwick Twp., York Co.  
U. S. G. S. Berwick, Me.

Fishes

Brook trout (squaretail)  
Chain pickerel  
Hornpout (bullhead)

Physical Characteristics

Area - 19 acres

Temperatures

Surface - 78° F.  
5 feet - 69° F.

Maximum depth - 5 feet

Principal Fishery: Pickerel, brook trout

Beaver Dam Pond is a shallow, warm water pond. The water is very dark and the water quality is not considered suitable for coldwater fishes. The pond is stocked with "put-and-take" brook trout each spring but there is very little if any carry-over due to the warm water and oxygen deficiencies during the late summer.

To provide a "put-and-take" trout fishery in this area of Maine that does not have many natural trout waters, it is recommended that the usual stocking of brook trout continue.

Surveyed - July, 1971
