

TURNER POND (Mirror Lake)
Newfield Twp., York Co.
U. S. G. S. Newfield, Me.

Fishes

Smallmouth bass	Eel
Yellow perch	White sucker
Chain pickerel	Minnows
Hornpout (bullhead)	Golden shiner
	Pumpkinseed sunfish

Physical Characteristics

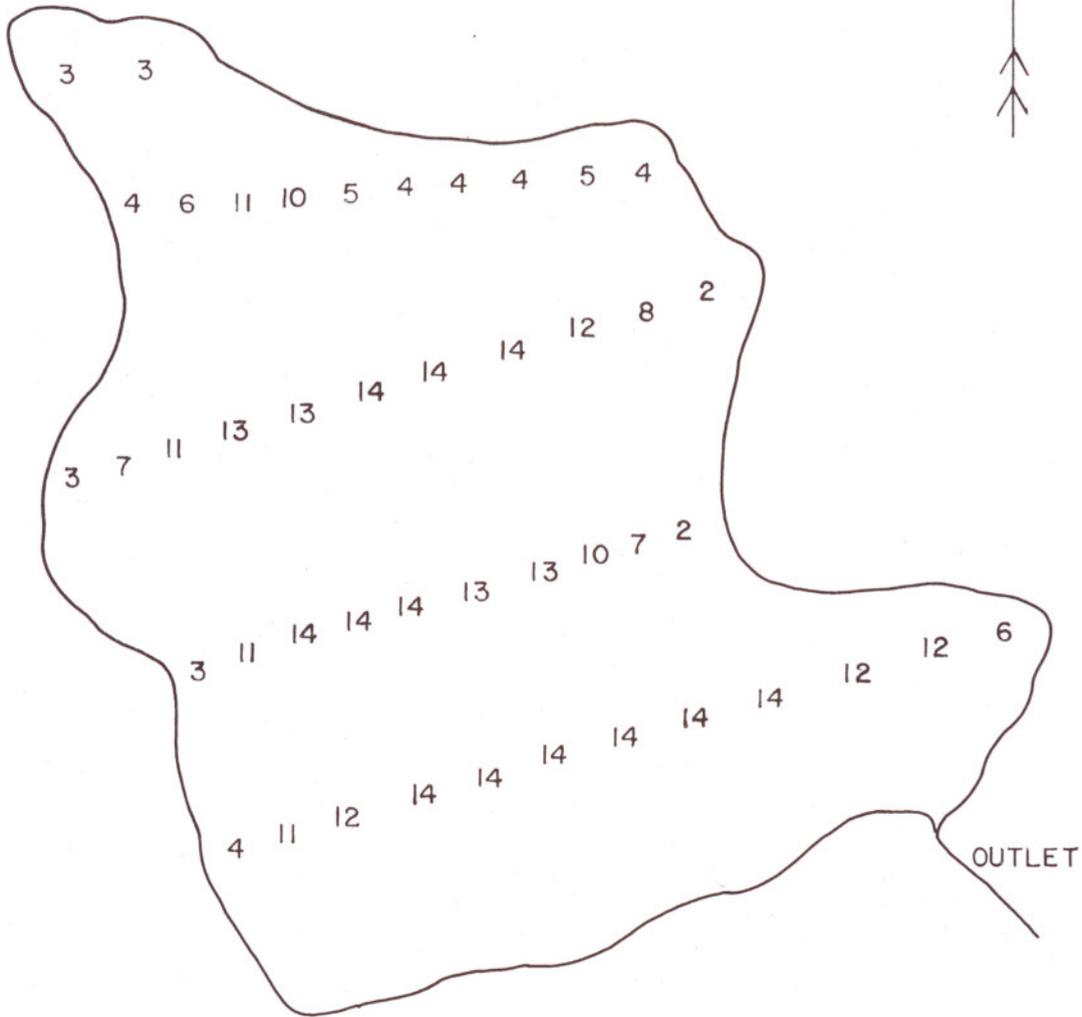

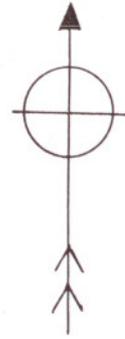

Area - 32 acres	Temperatures
	Surface - 81° F.
Maximum depth - 14 feet	13 feet - 78° F.

Turner Pond supports a good population of pickerel and a limited number of smallmouth bass. A lack of suitable spawning gravel and the small size of the pond result in a limited bass fishery. The major fishery will be for pickerel.

The extremely high summer water temperatures are enough to prevent the establishing of either trout or salmon.

Surveyed - August, 1959
Maine Department of Inland Fisheries and Game
