T8 RIO, AROOSTOOK CO., MAINE
NEW BRUNSWICK, CANADA

AREA 1029 ACRES

GLAZIER LAKE

T18 R10, Aroostook Co.
U.S.G.S. St. Francis, Me-N.B. (7.5')
U.S.G.S. Beau Lake, Me-Que.-N.B. (7.5')
U.S.G.S. Falls Brook Lake, Me (7.5')

Fishes

Landlocked salmon	Common shiner
Lake trout (togue)	Blacknose dace
Brook trout	Creek chub
Lake whitefish	Fallfish (chub)
Round whitefish	Pearl dace
Rainbow smelt	Longnose sucker
Yellow perch	White sucker
Muskellunge	Burbot (cusk)
Minnnows	Threespine stickleback
Lake chub	Slimy sculpin
Golden shiner	

Physical Characteristics

Area - 1029 acres

Temperatures:

Maximum depth - 118 feet

Surface - 70°F

100 feet - 41°F

Principal fisheries: Landlocked salmon, lake trout, brook trout, muskellunge

Glazier Lake is located on the St. Francis River on the Maine / New Brunswick border. The shoreline is little developed on the Maine side with steep forested ridges rising from the water's edge. The Canadian side is less scenic and has several camps along the shoreline. The lake is deep with a large volume of cold, well-oxygenated water.

Glazier Lake supports wild populations of togue, salmon and brook trout. Supplemental stockings of these fish have also been done by Maine and New Brunswick. Muskellunge have accessed the lake from the St. John River via the outlet and now provide an attractive sport fishery for large adult fish.

Access to Glazier Lake from the Maine side is via private gravel roads built and maintained by industrial landowners for forest management purposes. An unimproved seasonal access is located at the foot of the main lake. An improved boat launch is available on the New Brunswick shore. Travel to this access is via the Fort Kent border crossing.

Surveyed - August, 1959
