

## **WHEELOCK LAKE**

St. John Plt., Aroostook County  
U.S.G.S. Wheelock, Me. (7½')

### **Fishes**

Brook trout	Minnows, cont.
Minnows	Creek chub
Northern redbelly dace	Pearl dace
Finescale dace	White sucker
Blacknose dace	Brook stickleback

### **Physical Characteristics**

Area – 114 acres

Temperatures:

Surface - 67°F

14 feet - 64°F

Maximum depth – 20 feet

Mean depth – 10 feet

Principal fisheries: Brook trout

Wheelock Lake has almost equal water temperatures at all depths. The lake has marginal habitat conditions for brook trout. A large population of white sucker reduces trout production considerably. A few small tributaries provide limited spawning and juvenile habitat for trout. A beaver dam on the outlet occasionally increases the size and depth of the lake. Wheelock Lake also supports a winter fishery for brook trout.

The pond can be accessed via private gravel roads used and maintained for forest management activities. An unimproved boat landing exists in the northwest corner of the lake.

Surveyed – August, 1959
