

COFFIN POND  
Brunswick Twp., Cumberland Co.  
U.S.G.S. Bath, Me.

Fishes

Brook trout (squaretail)    Ninespine stickleback

Physical Characteristics

Area - 5 acres	Temperature
	Surface - 74° F.
Maximum depth - 13 feet	12 feet - 63° F.

Suggested Management

Management of Coffin Pond for brook trout is not recommended because of the oxygen deficiency below five feet and small size of the pond.

The pond could probably be managed for white perch or largemouth bass if fishing were confined to children with a bag limit of 2 or 3 fish. Fishing pressure would be tremendous and annual planting of fish would have to be made.
