

## NORCROSS POND

Chesterville, Franklin County  
U.S.G.S. Farmington Falls, Maine (7½')

### Fishes

Brown trout	Minnows
Brook trout	Golden shiner
Rainbow smelt	White sucker
Largemouth bass	Hornpout (bullhead)
White perch	Pumpkinseed sunfish
Yellow perch	American eel

### Physical Characteristics

Area - 122 acres	Temperatures
	Surface - 73°F
Maximum depth - 24 feet	20 feet - 60°F

Principal fishery: Brown trout, largemouth bass, white perch, and chain pickerel

Norcross Pond is located southwest of the Chesterville Esker. Its inlet flows in at the south end from Mosher Pond. The outlet flows north into Little Norridgewock Stream. The north and east shorelines are developed.

Water quality is marginal for coldwater gamefish with warm temperatures in the upper levels and oxygen deficiency in the lower levels. Spawning habitat for coldwater species is poor. Brown trout are stocked to provide a coldwater fishery. Norcross Pond also has good fisheries for warmwater species.

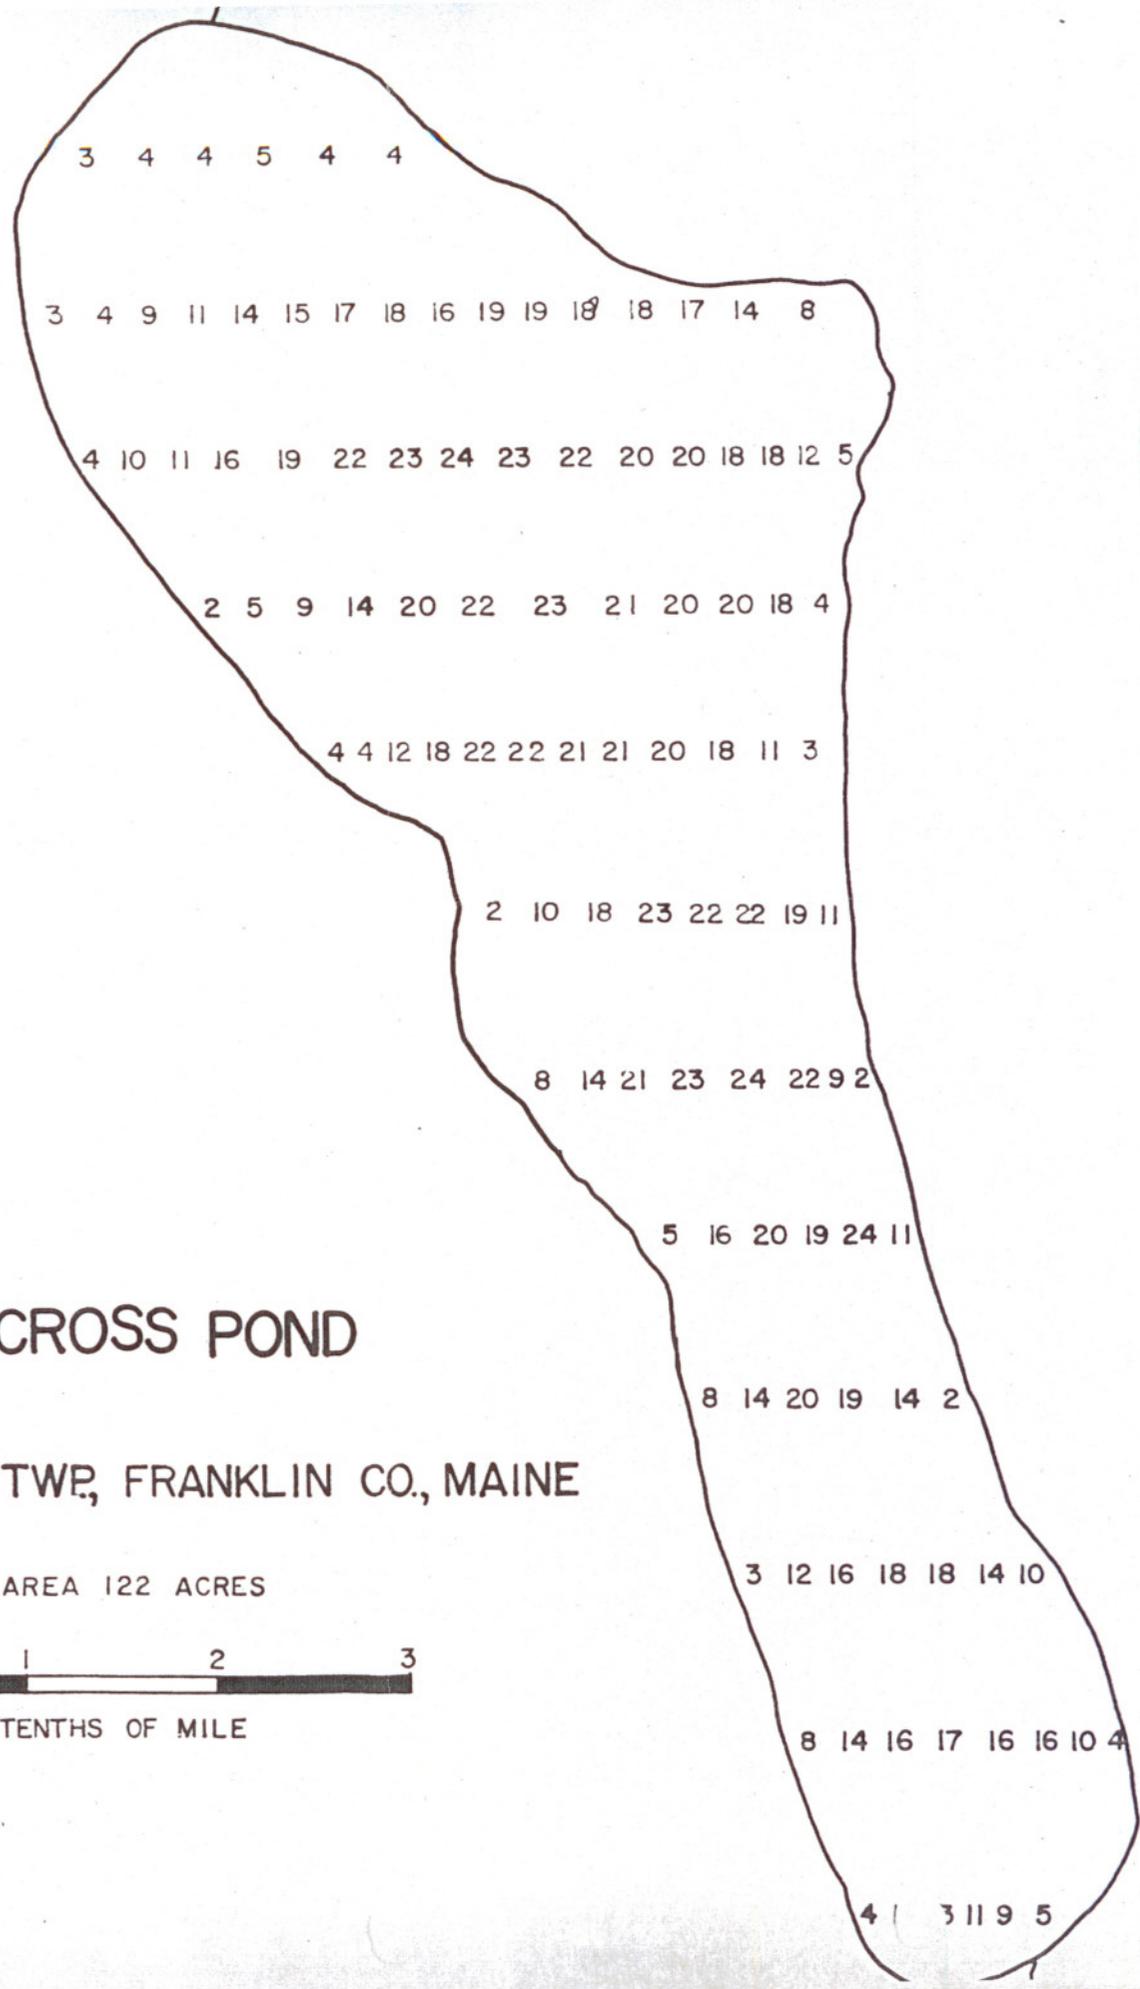

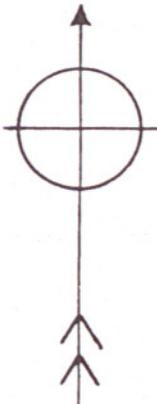

Norcross Pond is accessible from a gravel launch site off the Ridge Road. The pond is open to general law fishing in both the summer and winter seasons.

Surveyed - August, 1958
