

LITTLE POND  
Plantation No. 33, Hancock Co.  
U. S. G. S. Great Pond, Me.

Fishes

Chain pickerel	Pumpkinseed
Minnows	sunfish
Golden shiner	

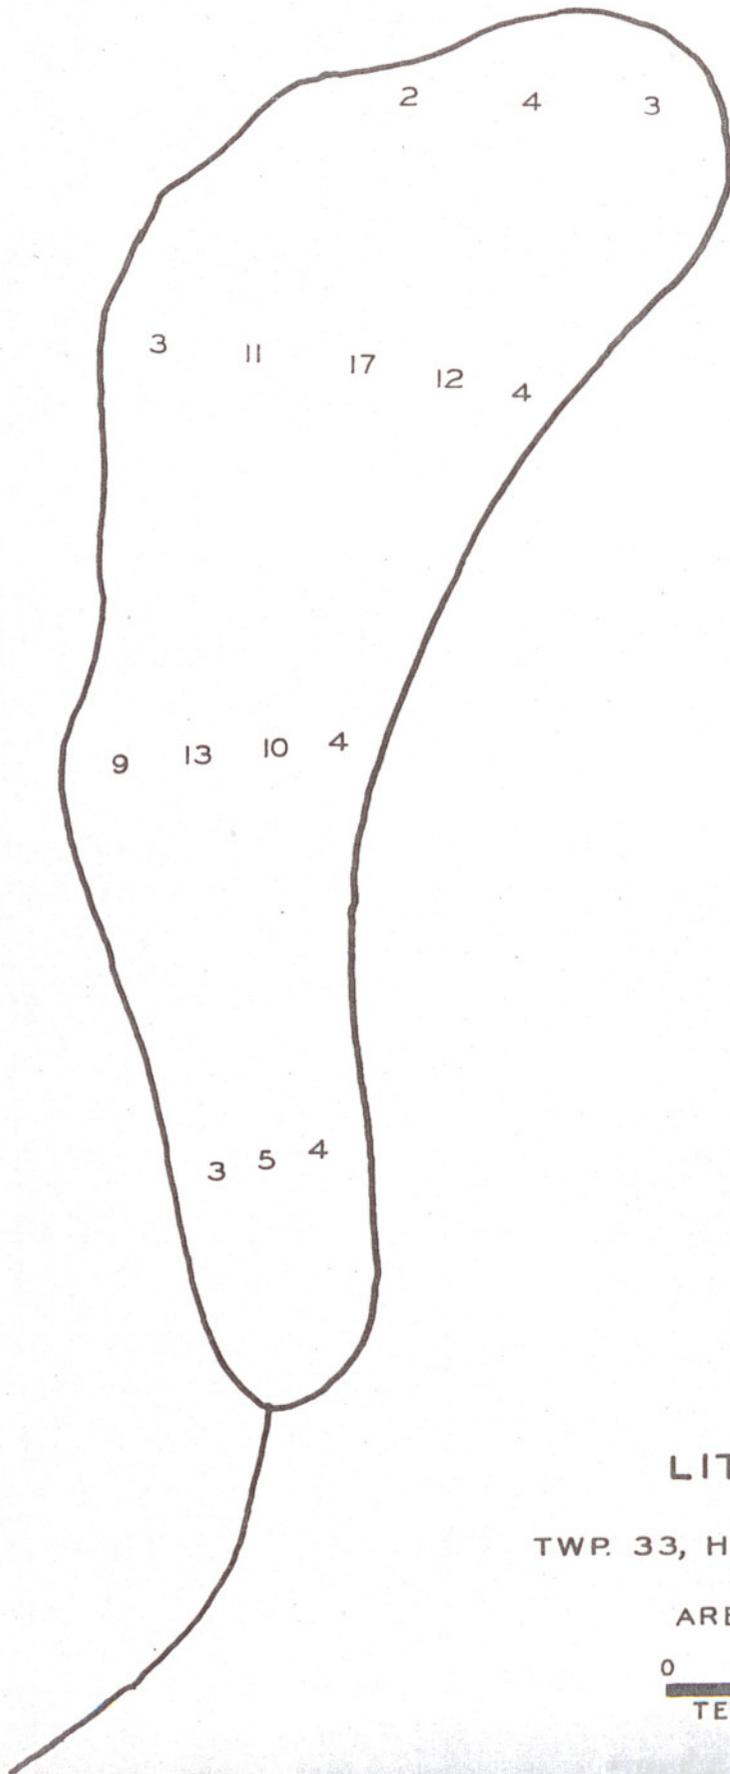

Physical Characteristics

Area - 32 acres	Temperatures
	Surface - 72° F.
Maximum depth - 17 feet	15 feet - 68° F.

Suggested Management

Little Pond is a warm, shallow pond. Large populations of sunfish, chain pickerel, and golden shiners were observed. There are no adequate tributaries and the outlet is presently blocked by a large beaver dam.

The size and general characteristics of this pond preclude stocking of either warm-water or cold-water fishes. Little Pond should be managed for the pickerel fishery.
