

LITTLE DYER POND

Jefferson Twp., Lincoln Co.
U.S.G.S. North Whitefield, Me. (7.5')

Fishes

Smallmouth bass	White sucker
Largemouth bass	Hornpout (bullhead)
Chain pickerel	Pumpkinseed sunfish
Minnnows	American eel
Golden shiner	

Physical Characteristics

Area - 109 acres	Temperatures:
	Surface - 71°F
Maximum depth - 19 feet	19 feet - 58°F

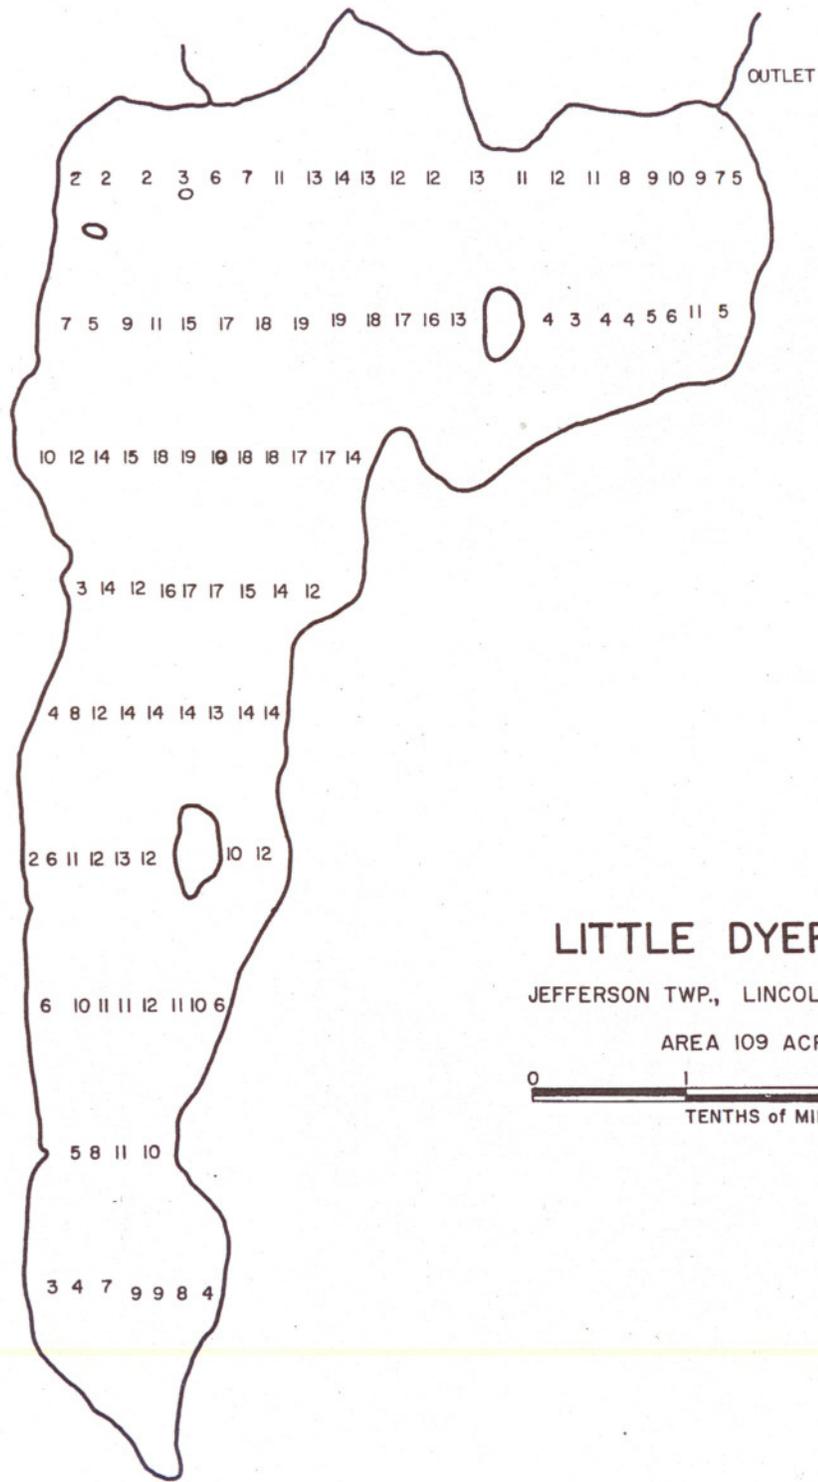

Principal fisheries: Smallmouth bass

Little Dyer Pond is relatively shallow with a maximum depth of 19 feet. An oxygen deficiency exists at depths of 15 feet and over. Poor spawning and nursery habitat is available for coldwater sportfish. Therefore, management is for the present good smallmouth bass fishery.

There is no state-owned boat launch facility on Little Dyer Pond. Launching a canoe at an unimproved facility located on the outlet stream will provide access to both Little Dyer Pond and Kerr Pond.

Surveyed - August, 1960
(Revised - 2002)
Maine Department of Inland Fisheries and Wildlife
Funded in part by the Federal Aid in
Restoration Act under
