

HASTINGS POND
Bristol Twp., Lincoln Co.
U.S.G.S. Monhegan, Me.

Fishes

Brook trout
Eel

Minnows
Golden shiner

Physical Characteristics

Area - 11 acres

Temperatures

Maximum depth - 19 feet

Surface - 74° F.
15 feet - 46° F.

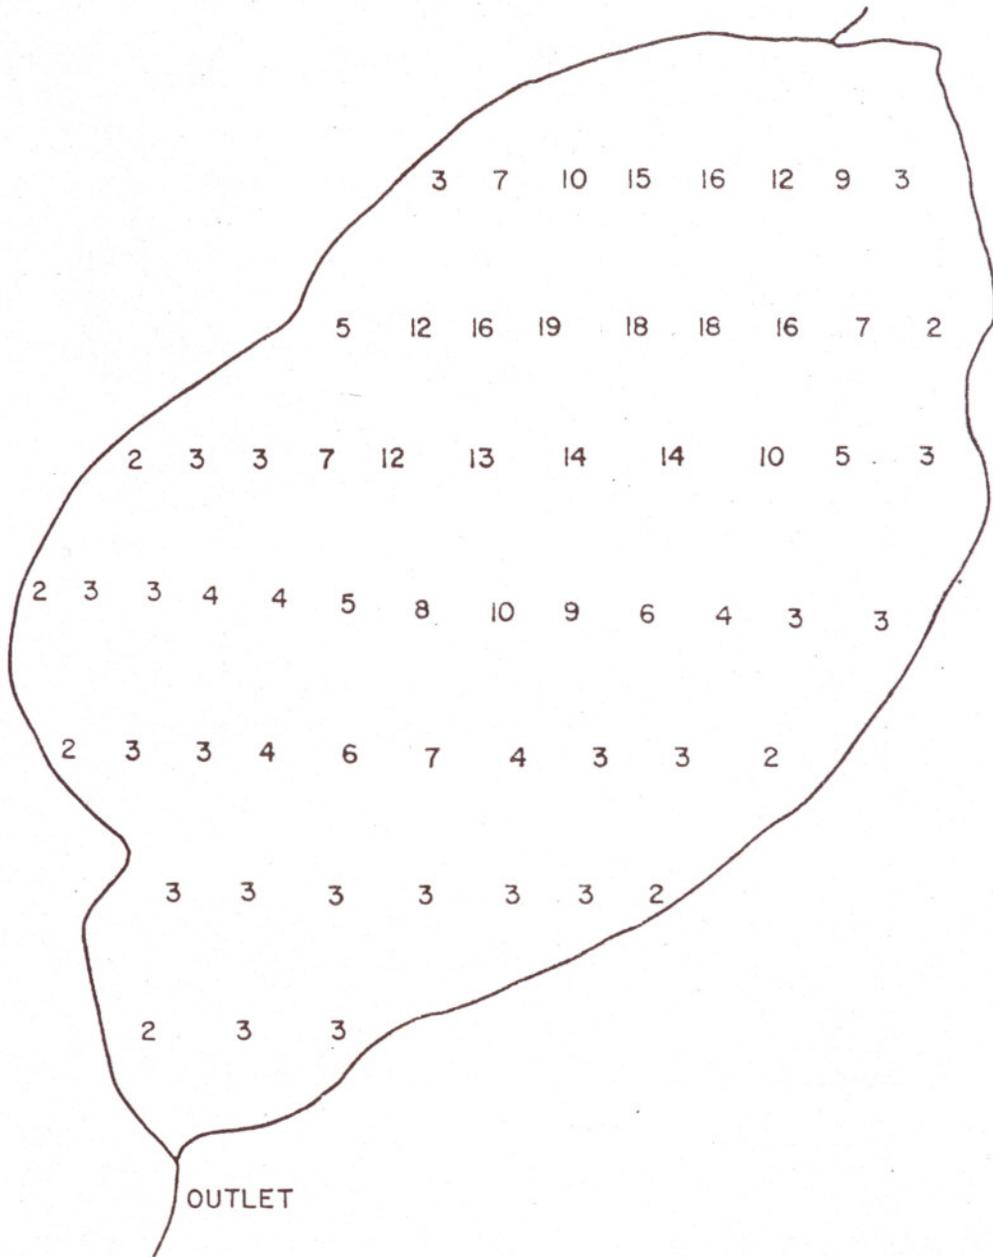

Principal Fishery: None

Although annual plantings once provided fair brook trout fishing, subsequent evaluation has revealed poor water quality and poor returns of stocked trout to the angler. Consequently, the stocking program has been terminated and the Department will request removal of the special fly fishing only regulation.

Surveyed - August 1959

Revised, 1987
