

MIDAS # 5402
PINKHAM POND

ALNA TWP., LINCOLN CO., MAINE

AREA 21 ACRES

PINKHAM POND

Alna Twp., Lincoln, County
U.S.G.S. Wiscasset, Maine (7½')

Fishes

Brook trout
White sucker

Minnows
Golden shiner
Pumpkinseed sunfish

Physical Characteristics

Area - 21 acres

Maximum depth - 14 feet

Principal fishery: Brook trout

Temperatures:

Surface - 72°F

12 feet - 68°F

Although initial results from an experimental stocking of brown trout were good, subsequent evaluation indicated poor returns to the angler and the program was terminated.

Pinkham Pond was chemically reclaimed in the fall of 1991 to remove undesirable fish species that are competitors with brook trout. Even though 3 fish species have become re-established, the pond is being managed through annual stockings of brook trout. Heavy fishing pressure, on this easily accessible pond, during the spring is probably the main factor for the lack of older aged fish in the population.

Surveyed - August, 1954
