

WEYMOUTH POND
Stoneham Twp., Oxford Co.
U.S.G.S. North Waterford, Me. (7.5')

Fishes

Chain pickerel

Physical Characteristics

Area – 16 acres

Temperatures:

Surface - 73°F

Maximum depth – 19 feet

16 feet - 71°F

Principal fisheries: Chain pickerel

Weymouth Pond is a small pond with few camps and pleasant views of the surrounding hills, which create the impression of a remote fishing experience. Despite its “trout pond” appearance, this pond is homothermous and best managed for warmwater fisheries. The pond has limited weed beds, yet it reportedly provides excellent pickerel fishing.

There is no public access, and angler access is restricted to permissive trespass across privately owned property.

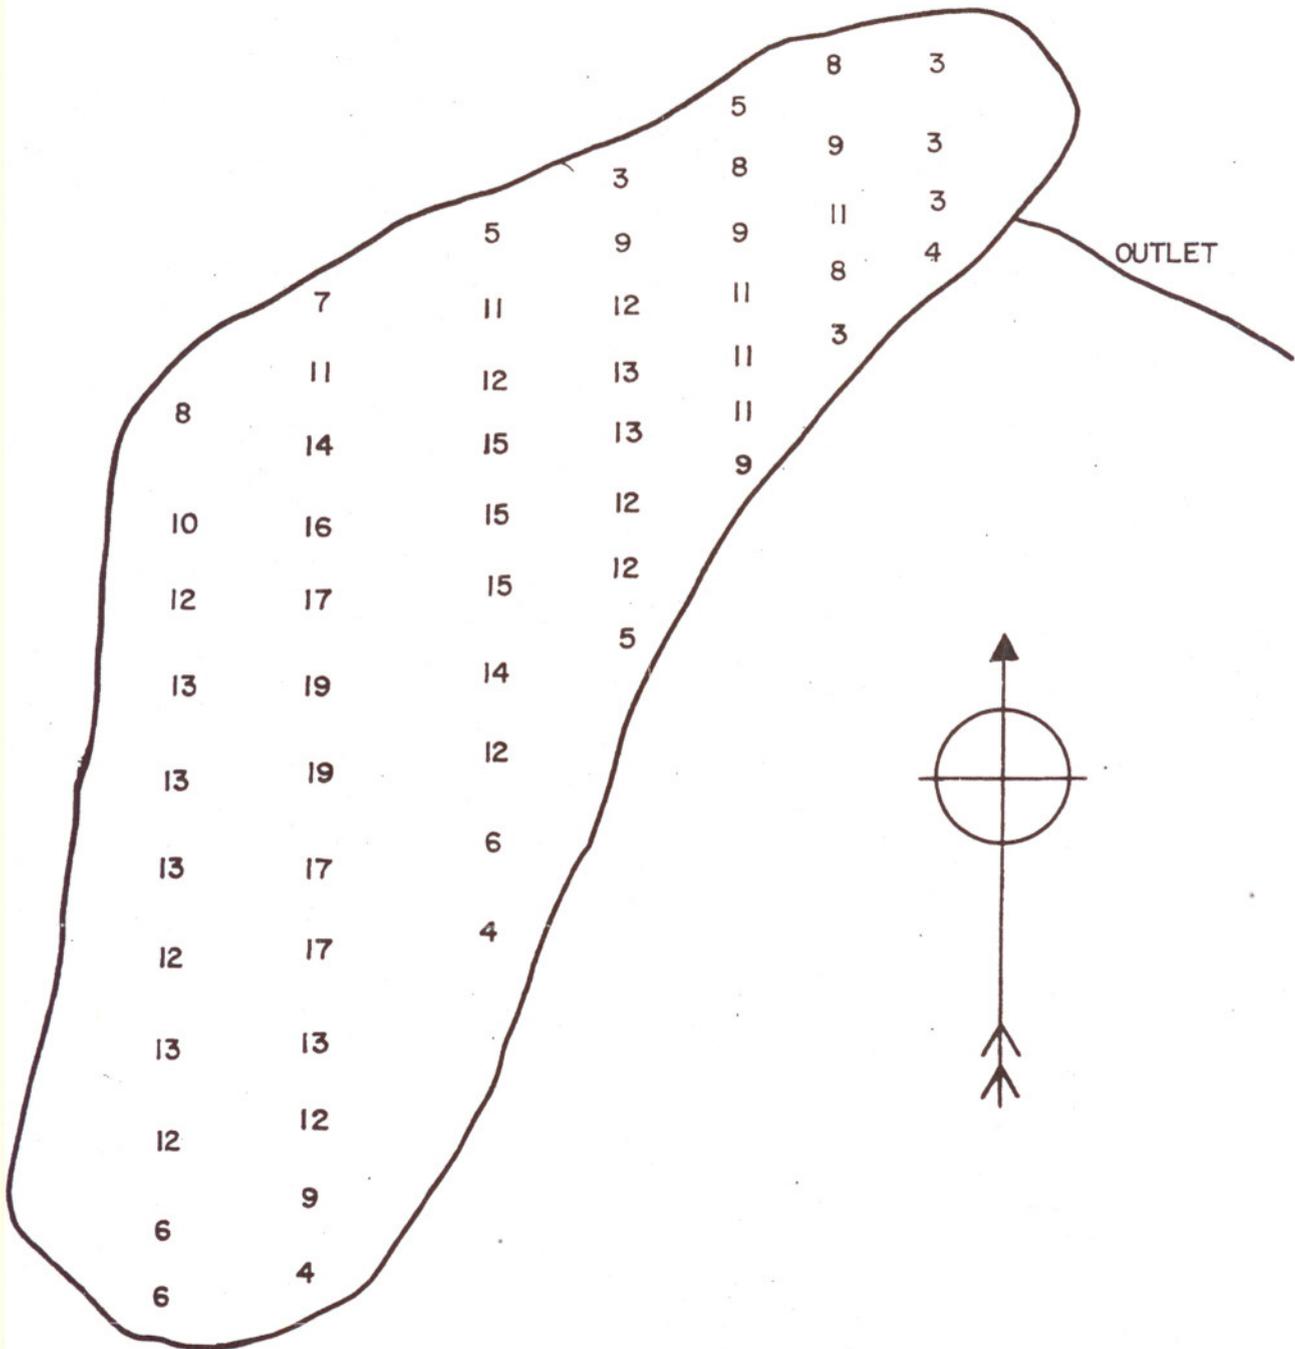

Surveyed – August 1958

(Revised – 2003)

Maine Department of Inland Fisheries and Wildlife
