

WHITNEY POND
Stoneham Twp., Oxford Co.
U.S.G.S. Fryeburg, Me.

Fishes

Chain pickerel
Pumpkinseed sunfish

Minnows
Golden shiner

Physical Characteristics

Area - 10 acres

Temperatures

Maximum depth - 5 feet

Surface - 79° F.
5 feet - 72° F.

Principal Fishery: Chain pickerel

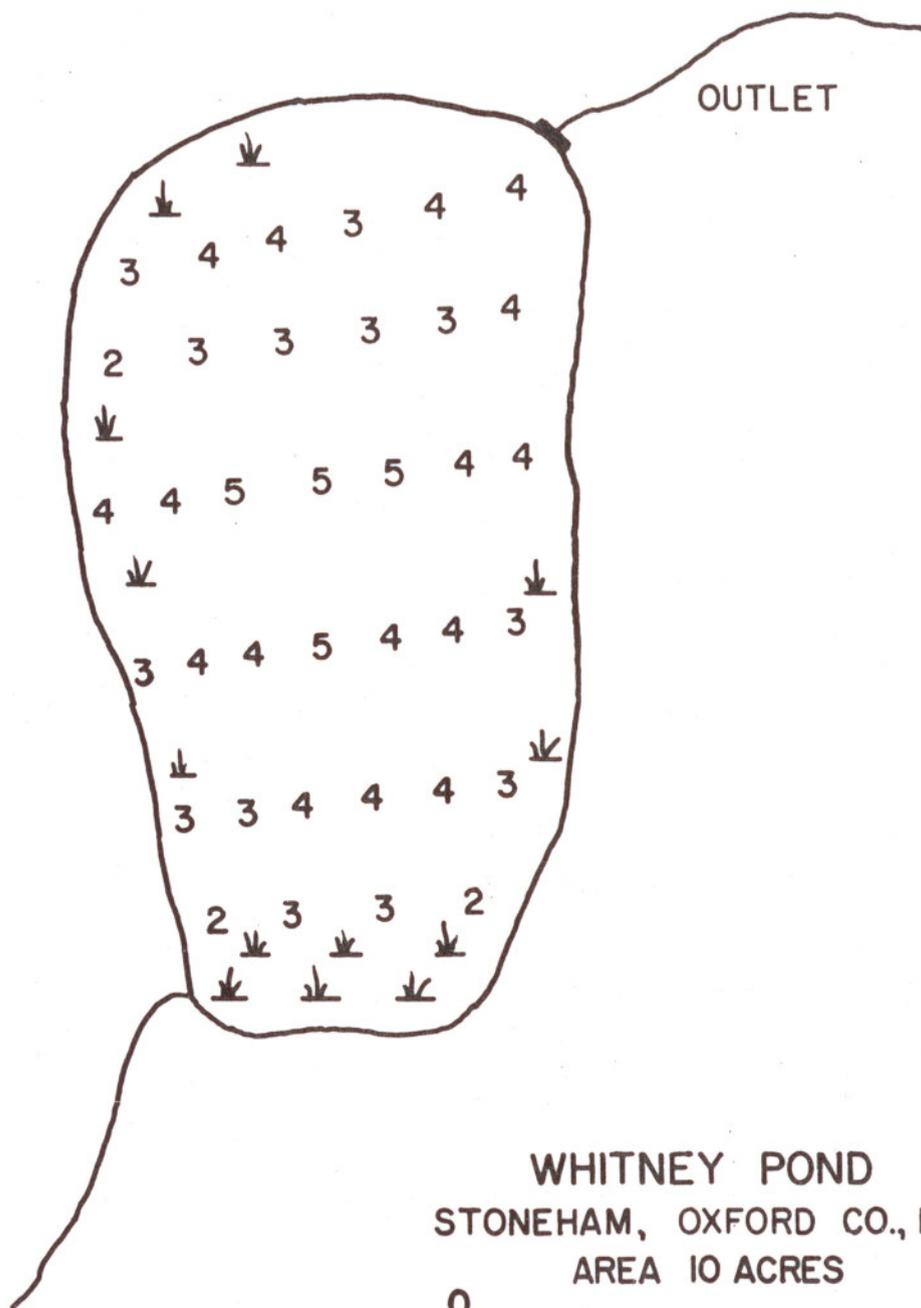

Whitney Pond is a shallow warm water pond and should be managed for the fish already present. A large portion of the pond surface is covered by floating vegetation and the pond provides excellent habitat for several aquatic animals.

There is no public right-of-way. Permission to reach this pond should be obtained from the property owner.

Surveyed - August, 1973

Maine Department of Inland Fisheries and Game

Published under Appropriation No. 4223
