

SAM HILL LAKE
T31MD, Washington Co.
U. S. G. S. Wesley and Tug Mountain, Me.

Fishes

Chain pickerel
Hornpout (bullhead)

White sucker
Minnows
Creek chub

Physical Characteristics

Area - 46 acres

Temperatures

Surface - 70° F.
31 feet - 45° F.

Maximum depth - 35 feet

Principal Fishery: Chain pickerel

Sam Hill Lake is a warmwater game fish lake. The great majority of the cold water present is deficient in dissolved oxygen, and thus unsuitable for brook trout.

Access to the pond is via an unimproved dirt road off Route 9. A canoe or small boat can be launched without too much difficulty at the bridge on the outlet.

The pond lies in a wilderness setting. For those who enjoy snowmobiling in to such a location and ice fishing for pickerel, Sam Hill Lake affords an excellent opportunity.

Surveyed - August, 1972

Maine Department of Inland Fisheries and Game
Published under Appropriation No. 4223
