

## HORNE POND (PEQUAWKET LAKE)

Limington Twp., York Co.

U.S.G.S. Steep Falls, Me. (7.5')

### Fishes

Brown trout	Minnnows
Brook trout	Golden shiner
Rainbow smelt	Fallfish
Smallmouth bass	White sucker
White perch	Hornpout (bullhead)
Yellow perch	Banded killifish
Chain pickerel	Pumkinseed sunfish
	Redbreast sunfish
	American eel

### Physical Characteristics

Area - 166 acres	Temperatures:
	Surface - 74°F
Maximum depth - 58 feet	35 feet - 41°F

Principal fisheries: Brown trout, brook trout, smallmouth bass, chain pickerel

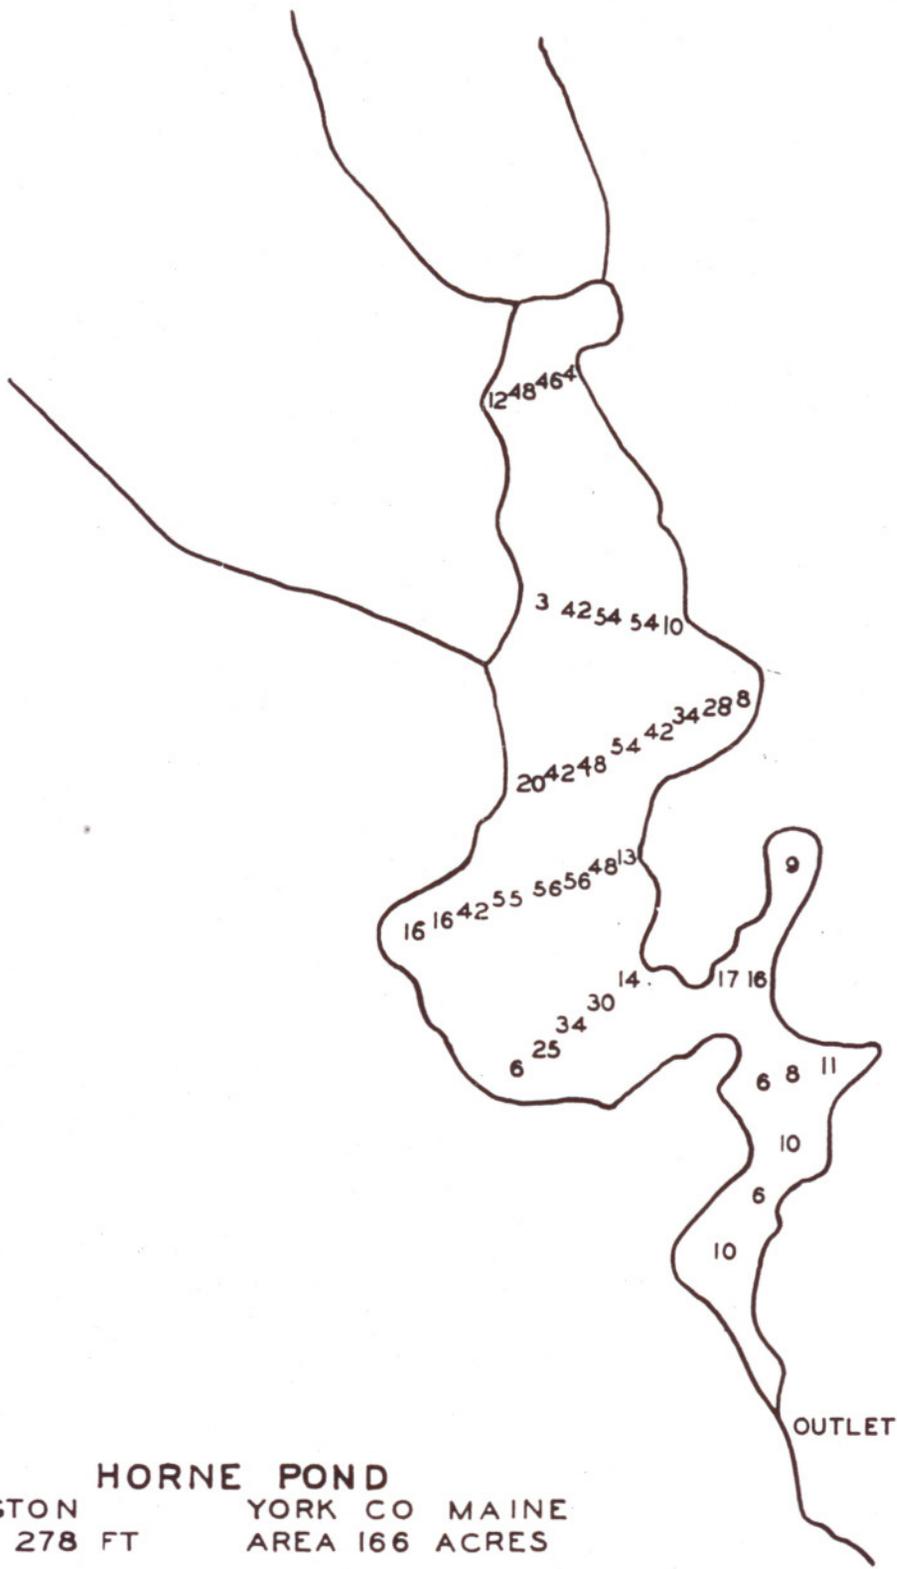

The shoreline of this pond is well developed with seasonal and year round homes, typical of ponds in York County. The pond thermally stratifies during the summer months, but areas below 30 feet deep are deficient in oxygen. Despite this limitation there is suitable water quality to support a coldwater fishery. Horne Pond is managed for cold and warmwater fisheries.

Brown and brook trout fisheries are sustained through an annual maintenance stocking program. There is insufficient spawning and nursery habitat to allow either species of trout to become self-sustaining. The presence of competing warmwater fish and somewhat limited water quality compromise trout management efforts.

Boat access is available at a privately owned camp ground located off the North Road. Public access accommodations are tentative and could be terminated in the future. There is a need to secure permanent public access provisions to this pond.
