Fax: (207) 287-5292

Maine Apprenticeship Program 2011 Annual Report

2011 Program Highlights:

At the close of 2011, there were 1,413 apprentices actively working on industry-recognized skill certifications.

Apprentices who completed their programs during 2011 saw an average wage increase of 63% from program start to program end.

On average, the Maine Apprenticeship Program leveraged nearly 110 times its taxpayer investment.

Women in Non-Traditional Occupations (*occupations in which women make up 25% or less of the workforce, such as building trades*) completed their apprenticeship programs at a wage 64% higher than the average female completion wage rate.

The first hybrid (competency & time-based) program was registered.

The first project to leverage workforce investment program funds was piloted.

2011 in Numbers

Total taxpayer dollars spent	\$467,269.21
Employer leveraged dollars (wages/ taxes)*	\$50,990,931.00
Tuition & Training dollars leveraged	\$361,787.00
Federal workforce dollars leveraged	\$125,000.00
ROI dollars leveraged per general fund dollar	\$110.17
Total served (new/active /completed/cancelled)	1603
Total new apprentices registered	159
Total apprentices completing programs	178
Total apprentices cancelled prior to completion	171
Percentage of women in NTO occupations	5.7%
Average starting hourly wage rate	\$11.82
Average ending hourly wage rate at completion	\$19.45
Average wage increase from start to completion	\$7.63

** ROI determination based on the NASTAD (National Association of State and Territorial Apprenticeship Directors) approved formula currently used by 25 state funded apprenticeship programs.

2011 Demographics

TOTAL	MALE	FEMALE	FEMALE-NT0	MINORITY	VETERAN
1413	1170	243	81	97	372

2011 - The Year in Review

- ❖ During calendar year 2011, total expenditures of \$467,269.21 leveraged 110 times that amount in apprentice wages, state income tax payments, matching tuition funds and federal training dollars. The return per each General Fund dollar was \$110.00. Approximately 60% of program expenditures were spent on training cost reimbursements to apprentices and sponsors, the remainder was spent on personnel and overhead.
- ❖ Revised statute was submitted and approved by the LCRED committee placing program authority under the Maine Department of Labor and renaming the “Standing Committee on Apprenticeship,” formerly under the auspices of the Maine Jobs Council (MJC), to “The Maine Apprenticeship Council” which will continue to advise the department and the MJC.
- ❖ Recommendations from the 2010 Apprenticeship Action Committee were implemented and a first of its kind Adult Pre-Apprenticeship pilot project was launched that utilized resources from five workforce investment programs and prepared 18 dislocated workers to enter employment as registered apprentices.
- ❖ Working collaboratively through the Maine Health Sector Grant, apprenticeship forged new and vibrant relationships with two of Maine’s hospitals in need of ongoing skill development pathways for newly hired nurses and technicians entering their employ. In partnership with Maine General Medical Center, work was begun on development of a series of specialty nurse care programs in areas such as Critical Care and Emergency Room Care and in partnership with Franklin Memorial Hospital, work continues on development of programs for Mammography and Surgical Technicians.
- ❖ Apprenticeship Council members approved revised standards and endorsed the Maine Marine Trades Association (MMTA) as the overarching sponsor for its members, which include employers in the boat manufacturing, service and repair industry. The MMTA appointed an Apprenticeship Committee and redeveloped programs in six disciplines,

- ❖ incorporating a first year Core-Skills component as a pre-requisite for advancing in all six programs, which include: Marine Joiner, Wooden Boatbuilder, Marine Engine Service Technician, Marine Electrician, Marine Composite Technician and an advanced program Marine Tradesperson targeted to industry supervisors.
- ❖ The range of active sponsors remained about the same at between 168 and 210 throughout the year, with some sponsors going dormant as apprentices completed programs and others re-activating with the hire and registration of new apprentices.
- ❖ Two new competency-based programs (Millwright and Lineman) sponsored by Cianbro Corporation, were unanimously approved and were the first competency/time-based hybrid programs to be launched in Maine.
- ❖ Council members implemented new policy regarding starting wage requirements that stipulate that the apprentice starting wage must be at \$10.00 per hour or fifty percent of the journey worker wage whichever is higher. The student Pre-Apprentice starting wage rate remains at minimum wage (\$7.50 per hour).
- ❖ In response to new federal requirements and the need to assure high-quality on-the-job-learning for all Maine apprentices, the Maine Apprenticeship Council approved a process by which sponsors can request reimbursement of the cost of instructor certification and training. An application process was implemented allowing sponsors to submit a request for assistance with instructor costs or the cost of innovative training initiatives that will improve overall programs and/or expand the level and type of skills training to be offered.
- ❖ The application process prioritizes sponsors who request instructor training that will also:
 - Result in more effective methods to impart skills to apprentices on the job,
 - Result in new skill training not currently offered as part of a program,
 - Result in new instructor certifications not yet held by existing trainers,
 - Result in certifications for proctoring competency tests,
 - Result in an increase of the number of or increased retention of women and minorities,
 - Result in overall cost reduction in training delivery,
 - Increase apprentices' competitiveness as well as industry competitiveness, and
 - Leverage high-cost match for apprentice training.

Statutory Authority

During the 2nd regular session of 2012 of the 125th Legislature the Maine Apprenticeship Program submitted **LD1800** “*An Act to Conform Maine Apprenticeship Program Standards with Federal Apprenticeship Regulations*” to the Committee on Labor, Commerce, Research and Economic Development. Recent changes to federal regulations provide that only a state agency can be held accountable for registration and approval of state apprenticeship programs.

In order to comply with these changes, LD1800 eliminates the Standing Committee on Apprenticeship of the Maine Jobs Council and establishes the Maine Apprenticeship Program under the Maine Department of Labor and renames the former committee which henceforth will be known as “The Maine Apprenticeship Council” and which will continue to assist and advise the department in administration of the program and work in collaboration with the Maine Jobs Council. In addition, the revised statute spells out the requirements of the program and delineates specific processes required for the registration and recognition of new programs, sponsors and apprentices. The full scope of the legislation will be listed under Title 26, Chapter 37.

Maine Apprenticeship Council

The Maine Apprenticeship Council consists of sixteen members who are familiar with apprenticeable occupations.

Twelve of the sixteen members of the council are voting members appointed by the Governor.

Four members must be representative of employees and be members of a recognized labor organization.

Four members must be representative of employers and be bona fide employers or representatives of employers.

Four members must be representative of the public and may not be industrial employers or employees or be directly concerned with any particular employer or employee; at least two of these members must represent the interests of women and minorities and representatives of recipients of benefits under the Temporary Assistance for Needy Families (TANF) program.

Four members of the council are non-voting members appointed by their respective agencies:

- One representative of the Maine Jobs Council,
- One representative of the Maine Community College System,
- One representative of the Department of Education, and
- One representative of Department Economic and Community Development

Council members serve a four-year term, or until a successor has been appointed. Council members appoint the council chair. The council meets on a quarterly basis to assist the department with respect to:

- Developing, approving and registering new apprenticeship programs and sponsors,
- Representing the Maine Apprenticeship Program to the Maine Jobs Council,

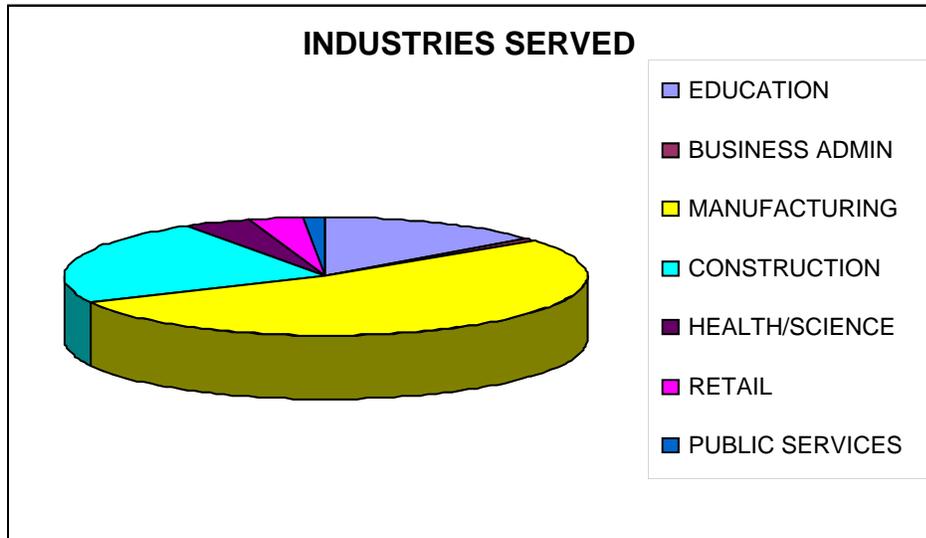

Reviewing and recommending additions or changes to program rules, policies, and processes,
 Ensuring registered apprenticeship programs meet state and federal requirements,
 Ensuring appropriate records of registered apprenticeship programs, registered apprentices and sponsors are created and maintained,
 Reviewing complaints apprenticeship program outcomes, and
 Ensuring an annual report is provide by March 1st of each year to the Governor, the joint standing committee of the legislature having jurisdiction over education and cultural affairs and labor and economic development matters, that includes names and locations of sponsors, number of apprentices registered and completing programs and the return on investment.

CURRENT VOTING MEMBERS

Industries Served

Program Benefits

Registered Apprenticeship is an industry-provided training system that integrates structured on-the-job learning with theoretical and academic instruction. Maine employer/sponsors can increase their competitive edge by ensuring their employees hold the highest level, nationally recognized industry skill credentials.

Benefits of Apprenticeship for Employers:

- Provides a formal, affordable, industry-endorsed skill development model.
- Attracts self-directed individuals interested in and committed to attaining high level skill credentials, thus reducing recruitment and attrition costs.
- Assures customers that services and products are provided by industry experts deemed proficient via national certification and credential processes.
- Equips journey worker experts with guides and methods to impart skills to new and advancing members of their workforce.
- Allows employers to pay rates that are commensurate with skill levels thus increasing competitiveness in the contract bidding arena.
- Provides formal career pathways and incentives for employees to increase their work-related knowledge.
- Ensures employees acquire required theoretical and academic knowledge.
- Improves worker retention, safety and productivity.
- Links companies to additional workforce-related programs and resources and provides a venue for them to voice their workforce skill needs to the education and workforce training system.

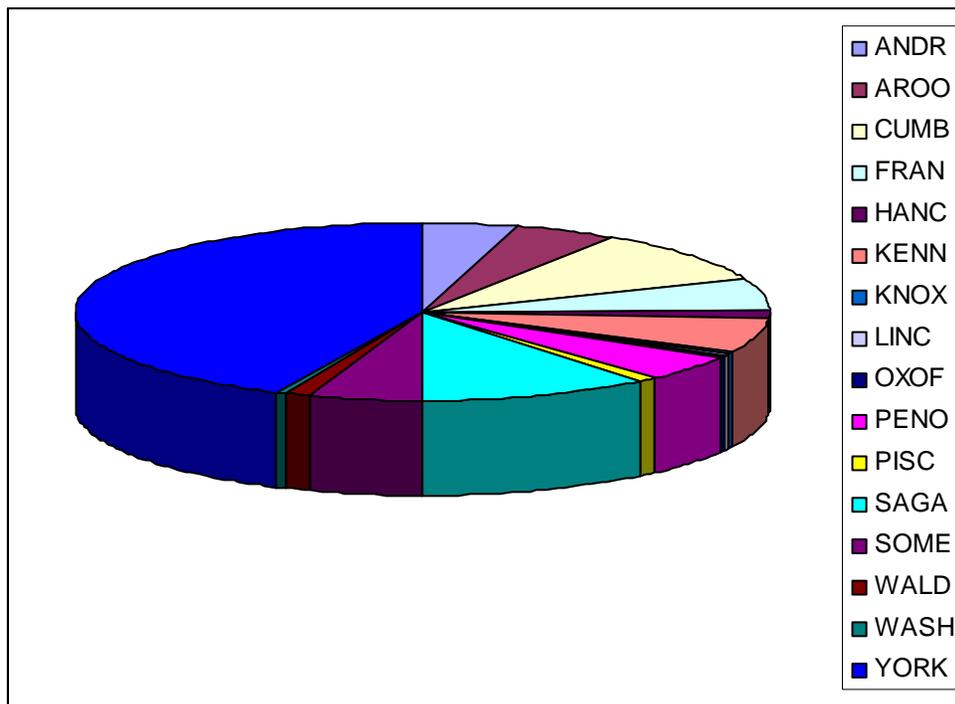

Benefits for Apprentices:

- Apprenticeship is an “earn-while-you-learn” training program.
- Achieve attainment of portable, nationally recognized credentials, degrees, licenses and certificates that ultimately increase worker competitiveness.
- May earn a Trades and Technology Associate Degree from the Maine Community College through a special articulation agreement that allows apprentices to complete degrees in expanded timeframes and earn college credits for their on-the-job learning.
- Compensates apprentices according to their education and skill gains.
- Exposes apprentices to new and emerging technologies, equipment, tools and processes not ordinarily available through traditional educational pathways.

Benefits for Workforce Development System:

- Strengthens local economies by developing highly trained and educated workers.
- Is demand driven, eliminating mismatch between skills taught to workers and skills employers need.
- Provides a customized and long term solution to skills gap industry is facing as highly skilled workers retire.
- Offers an affordable talent development approach for Maine’s workforce investment system that results in all required performance outcomes, specifically:
 - Attainment and retention of full-time employment,
 - Incremental earnings gains, and
 - Achievement of nationally recognized credentials.
