## FORM 2210ME INSTRUCTIONS

Purpose of Form. Use this form to see if you must pay a penalty for underpaying your estimated tax or paying your estimated tax late. Use Part I to see if you paid enough estimated tax on time. If you did not, use Part II to calculate the penalty on any underpayment.

Who Must Pay the Underpayment Penalty? In general, you will owe an underpayment penalty if your 2020 tax liability less allowable credits and withholding is $\$ 1,000$ or more and your 2019 tax liability before tax credits, income tax withholding or any other tax payment(s) for the tax year was $\$ 1,000$ or more. NOTE: Maine law disallows the use of the election to pay estimated tax based on the prior year's tax liability when an unusual event occurs, such as realization of a large, one-time capital gain. You must pay $90 \%$ of the tax on the unusual event income for the installment period during which the unusual event occurs. An unusual event occurs when taxable income for the estimated tax installment period exceeds the taxable income received during the same period in the prior tax year by at least $\$ 500,000$. If you received unusual event income during any estimated tax installment period beginning in 2020, you must adjust the estimated tax due on line 9 of this form for that period.

You will not owe an underpayment penalty or need to file this form if your 2020 tax liability reduced by allowable credits and Maine income tax withheld is less than $\$ 1,000$, or your 2019 tax liability was less than $\$ 1,000$. Even though you are required to file this form, you will avoid the underpayment penalty if you paid at least $90 \%$ of the 2020 tax on time.

Farmers and Fishermen. If you are a farmer or fisherman who files an income tax return and pays the tax liability in full on or before March 1 of the following year, no penalty is due.

Payment Method. Individuals must make four (4) equal installment payments of estimated tax unless they can document the actual liability for each required installment of estimated tax.

Use the actual liability method if your income varied during the year because, for example, you own a seasonal business or the majority of your income was received in one payment. Using this method may lower or eliminate the amount of your quarterly estimated tax payments. To calculate your actual liability, complete the Annualized Installment Worksheet for each payment due date and check the box on line 17 on this form and on Form 1040ME, line 34b or Form 1041ME, line 8b.

NOTE: Forms are available at www.maine.gov/revenue/tax-return-forms or call 207-624-7894.

Computation of Underpayment Penalty. Calculate the penalty on the amount of the underpayment of each installment for the period of underpayment. The penalty rate for calendar year 2020 is $.5833 \%$ per month or fraction thereof, compounded monthly. For calendar year 2021, the penalty rate is $.4167 \%$ per month or fraction thereof, compounded monthly. Enter on line 14 the appropriate rate from the table below that corresponds to the number of months shown on line 13. Multiply the underpayment on line 11a by the rate on line 14 and enter the result on line 15. Do not calculate the penalty for the 4th required payment if the tax return for the taxable year is filed and the tax is paid in full by January 31.

Fiscal-year filers may not use the table below.
